

SUBJECT INDEX

- absolute returns, 431, 432
- accuracy, 3, 18, 30, 55
- active investment strategies, 581
- adjusted R^2 , 173
- aggregation, 41, 67, 69–71, 73, 75, 80, 83, 84
- algorithm, 477–479, 493, 519
- annualized volatility, 433
- ARCH, 449
- asset allocation, 579
- asset returns, 599, 601, 602, 618, 630, 638, 641, 645, 646, 649
- asymmetry, 303
- asymptotic instrumental variable (AIV), 538, 545
- augmented Dickey–Fuller (ADF), 546
- autocorrelation function, 233, 234
- autoregressive (AR), 152, 154, 155

- B-GARCH(1, 1), 339
- Bayesian model average, 457
- Bayesian model averaging, 449, 478, 482, 562, 564
- Bayesian vector autoregression (BVAR), 100
- benchmark, 152, 154, 156, 158, 161, 178, 180, 183, 185
- bi-integrated process, 543
- bias, 9, 11, 12, 47, 49, 57, 62–64, 77, 83, 86
- biased, 9, 57, 64, 75, 86
- biasing, 47
- binary, 526, 530, 531
- binary prediction, 477, 478, 526, 529, 530
- block bootstrap, 199, 200, 204, 624
- Boivin–Ng criterion, 157, 185
- bond returns, 599, 602, 604, 608, 616, 637
- bootstrap, 105, 112, 114, 247, 477–479, 481–483, 491, 493, 530, 531
- Box–Jenkins method, 231, 232, 234, 235
- breaks, 338, 433
- British Pound, 316

- CAC 40, 316
- calibration, 425

- change in the unconditional mean, 305
- change-point detection, 303
- change-point detector, 317
- cointegration, 8, 10, 49, 51, 73, 271–274, 276–279, 282, 286, 288, 297
- collinearity, 48, 50, 78
- combination scheme, 641, 645
- combination weights, 599, 629, 631, 632, 635–637, 644
- conditional, 9, 11, 28
- conditional expectation, 68
- conditional heteroscedasticity, 28
- conditional median, 431
- congruency, 42, 45, 49, 50, 56, 76, 84–86
- constancy, 7, 17
- constant, 7, 8, 11, 12, 28, 30
- constant-change, 10
- core inflation, 172, 188, 189
- correction for heteroskedasticity and serial correlation, 351
- covariance stationary, 332
- CPI, 172, 189
- criterion, 152, 185

- data augmentation, 566
- data-generating process (DGP), 8, 10, 12, 41, 55, 67, 76, 86, 432
- DAX, 316
- DDV, 10, 11
- defined objective function, 427
- degree of normalization, 438
- deterministic, 22, 41, 51–53, 55, 57, 62, 63, 83
- deterministic trend, 19–21, 30
- Diebold and Mariano test procedure, 350
- differenced device (DD), 52, 63
- differenced vector equilibrium-correction, 51
- differenced VEqCM (DVEqCM), 10, 52
- differences, 9, 10, 44, 52
- differencing, 9, 10, 12, 42, 52, 57, 62, 63, 76, 80
- diffusion index, 149, 150, 153, 191
- disaggregated, 41–43, 67, 69, 71, 73, 75, 80, 83, 84

- disaggregation, 41, 42, 65, 67, 71, 80
 discounted least squares (DLS), 101
 distance-based, 427
 double-differenced device (DDD), 52, 63,
 67, 73–76, 83
 double-differencing, 43, 52, 62, 73, 76, 80,
 84, 183, 189, 192
 Dow Jones Industrial Average, 316
 dummy, 85
