

Index

- Activation level, 196–197, 199–200, 202–205, 210
- Activity-based model, 126, 139–141, 190, 214
- Activity-based travel demand models, 2
- Activity-travel behaviour, 117, 158, 189–210
- Activity-travel choice task, 122
- Advantage maximization, 10
- Agent-based models, 213, 228–229
- Albatross, 138, 140, 151–154, 157–159
- Aspiration levels, 7
- Aspirations, 189–191, 195, 198–201, 204–206, 209–210
- Association pattern technique, 120
- Attribute, 1, 3–12, 14–20, 22, 24–25, 32–37, 46, 55–56, 63, 66, 68, 73–76, 79–85, 87–89, 91–93, 96–105, 111, 119–121, 123, 125–126, 129–130, 147, 157, 193–194, 196, 198, 236, 246
- Attribute non-attendance (ANA), 1, 17–18, 73–81, 83–92
- Attributes, 1–10, 13–21, 23–25, 31–33, 35–39, 41, 46, 51, 53, 59, 62, 66, 68–69, 73–84, 86–89, 92, 96, 98–102, 105, 115, 117–121, 123, 125–131, 157, 192–194, 197–198, 215–218, 229, 235–237, 244, 246–249
- Awareness, 195, 199–200
- Awareness reinforcement parameter, 195
- Awareness retention rate, 195, 200
- Bayesian Decision Network, 118
- Bayesian learning, 218
- Bayesian networks, 137–138, 141–142, 144–146, 149, 152–156, 158–159
- Bayesian updating, xviii
- Behavioural change, 222, 246–248
- Behavioural economics, 56, 235, 244
- Behavioural equilibrium, 190, 229, 247
- Beliefs, 102–103, 105–107, 116, 191, 193, 199–200, 215–219, 225–226, 228
- Benefits, 115–119, 121, 123, 125–126, 128–131, 221, 237
- Bias, 59, 76, 81, 92, 122, 239
- BNT classifier, 137, 143, 149–150, 152–159
- Bounded rationality, 1, 3, 5–7, 9–11, 13, 15, 17, 19, 21, 23, 25–26, 51, 68–69, 74, 95–96, 98, 102, 111, 137–141, 143, 145, 147, 149, 151, 153, 155, 157, 163–165, 167, 169–171, 173, 175, 177, 179, 181, 189, 191, 209, 213, 215, 222, 226, 228, 234–235, 244, 249
- Causal knowledge, 115, 118
- Causal network, 115, 117–118, 120, 129
- Causal Network Elicitation Technique (CNET), 115, 117, 121–122, 132
- CB-CNET, 122
- Censored normal distribution, 75
- Centrality of variables, 129
- Choice complexity, 74–75

- Choice set, 1, 3–8, 10, 12–14, 19–21, 23–25, 38, 50–55, 57–58, 62–64, 66, 68–69, 97, 111, 119, 123, 126, 131, 190–198, 200, 202–204, 206, 208, 210
- Choice set formation, 19, 23, 25, 191–192, 194
- Choice set generation, 23–24, 54–55, 62–63
- CNET card game, 122
- Cognitive mapping, 119
- Cognitive maps, 116
- Cognitive responses, 193
- Cognitive space, 4, 6–8, 20, 25
- Cognitive subsets, 123, 125–126, 128–130
- Compensatory choice, 25, 75
- Competing destination model, 11
- Compromise alternatives, 10
- Conjunctive decision rule, 6–8, 20, 23
- Consideration set, 4, 6, 15, 19–21, 23–24
- Constrained latent class model, 76
- Construal Level Theory, 119
- Context-dependent choice models, 10–11
- Cumulative Prospect Theory (CPT), 142–143, 235, 240–242, 245, 248–249
- Decision process, 1–4, 19, 38, 77, 95–98, 100–101, 111–112, 117–118, 140, 215, 220, 225
- Decision rule, 1, 6–8, 10, 20, 23, 25, 31–33, 38, 41, 46, 97, 137–138, 141, 146–147, 149, 154, 156, 158–159, 213–217, 222–223, 225, 235
- Decision rules, 1, 6–7, 10, 23, 25, 31–33, 38, 41, 46, 97, 137–138, 141, 146–147, 149, 154, 156, 158–159, 213–217, 222–223, 225
- Decision strategies, 74, 107, 111
- Decision trees, 137–138, 146, 149, 152–154, 157–159
- Descriptive theory, 163, 213, 215, 229
- Dirichlet distribution, 218
- Disjunctive rule, 7–8, 14, 96
- Dynamics, 2, 163, 168, 189–193, 195, 197–199, 201, 203, 205, 207, 209–210, 213, 223, 227–229
- Dynamic traffic assignment, 163–165, 167, 169, 171, 173, 175, 177, 179, 181
- Dynamic user optimal, 163, 169, 172
- E-Commerce, 123–128, 130–131
- Elimination by aspects, 38
- Emotional responses, 191, 193–194, 199, 206, 210
- Entropy measure, 74, 149
- Error variance, 74–75
- Expected utility, 23, 137, 193–194, 196–197, 200–201, 203–205, 207–208, 210, 233, 235–237, 239
- Expected Utility-maximization (EUT), 137–138, 193–194, 235–237, 239, 242
- Exploitation, 197–198, 200, 202–205, 207–209
- Exploration, 132, 191, 197–198, 200, 202–210, 229
- Feasibility, 2, 177, 179
- Forgetting, 189, 191, 199–200, 202, 209, 216, 218
- Four-step model, 2, 214
- Gap function, 175, 177
- G-RRM, 33–39, 41, 46
- Habit formation, 189, 191, 196, 199
- Hard laddering, 120
- Heterogeneity, 4, 18, 25, 31–33, 41, 46, 53, 58–60, 69, 76–77, 80–81, 92, 95–96, 111, 116–117, 131–132, 248
- Heuristic, 15, 20, 22–25, 74, 95–97, 99–107, 109, 111–112, 140–141, 171, 177, 214, 228
- Hidden Markov chain, 213, 222–223

- Hierarchical value maps, 120
 Hyperbolic response curve, 9
- Inertia, 190, 196
 Inferred attribute non-attendance, 73
 Influences on attribute non-attendance, 73–93
 Information load, 73–77, 79–81, 83–85, 87–89, 91–92
 Instrumental Variable, 220–221
 Interview protocol, 121
- Laddering, 116, 120, 132
 Latent Class, 5, 17–18, 31–33, 37–39, 46, 54, 74, 76–78, 96, 116
 Latent class model, 17, 54, 74, 76, 96
 Learning, 132, 137–138, 140–143, 145–146, 152, 163, 189, 191, 199, 209, 213–218, 223, 227–229, 248–249
 Lexicographic rule, 1, 14–17, 23, 75, 95–97, 100, 111
 Lexicographic choice, 14, 23, 75
 Lexicographic semi-order, 15
 δ -logit, 19
 Lognormal distribution, 81, 84, 91
 Long-term change, 190–191, 198–199, 207
- Maximax decision rule, 9
 Maximin decision rule, 9
 Means-end-chain, 120–121
 Means-end-chain theory, 120
 Memory decay, 189, 195
 Memory retrieval ability, 195
 Mental effort, 25, 95, 97, 102–103, 105–107, 111–112, 119, 217
 Mental maps, 116
 Mental representations, 115–117, 119–123, 125–127, 129–132
 Mind reading, 119
 Minimax decision rule, 9
 Minimum awareness level, 195
 Minimum difference lexicographic rule, 15
 Mixed Logit, 116
- Mixture model, 31–33, 37
 Multidimensional decisions, 214
 Multinomial logit, 2–3, 5, 10, 22–24, 50, 52, 77, 95, 98
 Multiple context dependency, 49
- Needs, 33, 91, 103–105, 115–119, 125–126, 131–132, 151, 159, 192, 198, 200, 210, 214, 217, 220, 229, 233
 Network equilibrium, 245–247
 Non-compensatory model, 23, 96
 Nonlinear complementarity problem, 163, 171, 174
 Nudge, 226, 247
- Number of alternatives, 20, 25, 54, 73–75, 80, 86–87, 89, 92, 206
 number of attribute levels, 15, 73, 75, 80, 87, 92
 number of attributes, 18, 32, 73–75, 80–82, 86–87, 89, 92, 96, 123, 125–126
 number of choice tasks, 80, 86–87, 89
 range of attribute levels, 81, 89
- Online shopping, 122, 123, 126, 130, 131, 132
 Ordered heterogeneous logit model, 75, 87
- Passive bounded rationality model, 74
 Perceived search cost, 217, 219–221
 Predicted irrationality, 247
 Preference heterogeneity, 76–77, 80–81, 92, 116
- Priming, 132
 Prospect, 49, 51, 56, 64, 66–68, 233–235, 237–241, 243–250
 Prospect Theory (PT), 51, 56, 64, 233–235, 237–250
- Random parameters attribute non-attendance (RPANA) model, 73–74, 76–78, 80–81, 83–88, 90–92

- Random Utility Models (RUM), 25, 31, 33–39, 41, 45–46, 49, 51, 132, 234, 250
