

# INDEX

- Active raised bogs/mires, 72
- Adequate access of water,
  - 14–17
- Advanced WASH facilities, 20
- Affordability, 17–18
- AG of the Federation v AG of Abia State and 35 Ors*, 114
- Agriculture, 25
  - water consumption, 25–26
- Aizkraukle Mire and Forests, 76
- Aklais Mire, 76
- Algal blooms, 28
- Australia, 83
  - addressing urban
    - water scarcity and efficiency in, 92–96
  - challenges for water management and security in, 84
  - post-colonial
    - approach to water management, 84
  - sustainable extraction, water scarcity and Murray–Darling Basin, 89–92
  - water management in, 84–88
- Behaviour change, 95
- Benue, 99
- ‘Big pipe in, big pipe out’, 86
- Billion cubic metres (BCM), 99
- Biophysical catchments, 41
- Bog(s), 72
  - hydrology restoration, 78
  - importance of, 73–74
  - vegetation and peat formation process, 75
- Capacity-building, 63
- Catchment management, 42, 54, 88
- Cena Bog Nature Reserve, 77
- Chad Hydrological Area, 99
- Clean water, 45
- Climate action, 4
- Climate change, 31, 33, 84, 93, 103
- CLTS process, 103

- Coal seam gas, 96
- Community
  - participation, 60
  - pushback, 93
  - in water management, 95
- Constitution of Federal Republic of Nigeria (1999), 114
- Cooperation and
  - participation, 69
- Cost-benefit analysis, 50
- Costa Rica, 53
- ‘Cultural water’
  - allocations, 85, 96
- Damaged peatlands, 74, 76
- Dams, 79, 122
- Decision-making, 40
- Deep aquifers, 30–31
- Demand-side efficiency
  - programmes, 94–95
- Department of Foreign Affairs and Trade (DFAT), 83
- Desalination, 30, 93, 122
- Digging ditches, 75–76
- Direct potable recycled water, 94
- Direct potable water
  - reuse, 94
- Drainage ditch, 80–81
- Droughts, 30
  - responses, 95
- Dublin Principles, 34, 36
- Eastern Littoral, 99
- Economic technocratic
  - approaches, 50
- Ecosystem services, 48, 71–72
  - SDG 6.6 and, 48–51
- Ecosystems, 122
  - conservation, 42
  - protection, 54–55
  - restoration, 55
- Effective water
  - governance, 42
- Engineering approaches, 124
- Environment, IWRM and, 43–45
- Eriophorum vaginatum*, 81
- Europe, experience of raised bog restoration in, 74–75
- Eutrophication, 27
- Extractive industries, 96
- Federal Government, 87
- Federal Ministry of Water Resources (FMWR), 101, 104
- Federal Republic of Nigeria, 99
- Flooding, 101
- Flushed sewage systems, 86
- Fracking, 96
- Fragmented institutions, 65
- Freshwater resources,
  - pressure on, 66
- Gender equality, 4
  - women and girls, 2, 11, 14, 21–22
- Global Analysis and Assessment of Sanitation and

- Drinking-Water (GLAAS), 15, 67
- Global Assessment of Water Supply and Sanitation (*see* Global Analysis and Assessment of Sanitation and Drinking-Water (GLAAS))
- Global Sanitation Fund in partnership, 103
- Global Water Partnership, 32
- Good water governance, 64–65
  - architecture and challenges, 104–108
  - structures, 65
- Green Climate Fund, 53
- Gross National Happiness, 55
- Groundwater, 30, 101
  - table observations, 79
- Grund norm, 114
  
- Human rights, 16, 18–19, 23, 112, 116, 119
- Human-made wetlands, 71
- Hydrological evaluations, 99
- Hydrological regime
  - of bogs, 76–78
  - restoration measures and results, 78–80
- Hygiene, 9
  
- Inclusion of Indigenous Peoples, 96
- Indigenous communities, 85, 96
- Indigenous land rights, 54
- Inland wetlands, 71
- Institutional inertia, 37
- Integrated water resources management (IWRM), 3, 10, 25, 31–34, 48, 68, 87, 111–112
  - and implementation, 39–43
  - and including environment, 43–45
  - and SDG6, 34–39
- International Development Community, 20
- International Union for Conservation of Nature (IUCN), 73–74
  
- Joint Monitoring Programme (JMP), 11, 13
  
- Çemeri National Park, 77
  
- Lake Chad, 103
- Lakes, 77
- Land use, 31
  - change, 31
  - planning, 31, 40
- Land Use Act, 114

- Large water infrastructure projects, 29–30
- Latvia, experience of raised bog restoration in, 74–75
- Latvian Environment, Geology and Meteorology Centre (LVGMC), 79
- Local governments, 106
  - councils, 106
- London School of Hygiene & Tropical Medicine, 103
- Lower Benue, 99
- Lowlands raised bogs, 74
- Market-based approach, 38
- Means of Implementation (MoI), 62, 68–69
- Melnais lake bog in Latvia, 75
  - impact of groundwater level rise on vegetation in, 80–81
  - peat extraction and drainage, 77–78
  - specifics of project, 75–76
- Millennium Development Goals (MDGs), 2–3, 10, 20
  - MDG 7, 10
  - WASH target, 10
- Millennium Ecosystem Assessment (MEA), 32–33
- Ministry of Water Resources, 104–105
- Mire/bog protection, 72
- Modern wastewater treatment, 28
- Modern Western diets, 38
- Multi-stakeholder engagement, 65
- Murray–Darling Basin, 83–84, 88–92
  - Basin Authority, 41
  - catchment, 41
- National Assembly, 114
- National Conference (2014), 116
- National Council of Water, 111
- National Hydrological Services Act, 112
- National Water Initiative (NWI), 87–88
- National Water Quality Management Strategy, 87
- National Water Resources Bill 2016, 109–113
- National Water Resources Institute, 111
- National Water Resources Institute Act, 112
- National Water Resources Policy, 108
- National water trading scheme, 88
- Native Title legislation, 85
- Natural resource management bodies, 88
- Neoliberal economics, 87

- Nigeria contiguous
  - catchments, 99
  - Chad Hydrological Area, 99
  - Eastern Littoral, 99
  - Lower Benue, 99
  - Niger Central, 99
  - Niger North
    - Hydrological Area, 99
  - Niger South, 99
  - Upper Benue, 99
  - Western Littoral, 99
- Nigeria and SDG
  - 6, 99
  - governance architecture and challenges, 104–108
  - harnessing law for universal access to WASH, 116–118
  - National Water Resources Bill 2016, 109–113
  - push factors, 113–116
  - status of access to WASH, 100–104
  - water, sanitation and hygiene components, 100
- Nigeria Hydrological Services Agency (NIHSA), 104–105, 111
- Nigeria Water Resources Regulatory Commission, 111
- npj Clean Water*, 68
- Official development assistance (ODA), 63, 67–68
- Open defecation, 102
- Optimal access of water, 16–17
- Organic pollutants, 28
- Organisation for Economic Co-operation and Development (OECD), 62–63
- Paris Agreement on climate change, 48, 74
- Partnership for Expanded Water Supply, Sanitation and Hygiene programme (PEWASH programme), 100
- Pathogen contamination of water, 27
- Peat extraction
  - and drainage, 77–78
  - methods, 75
- Peat-forming bogs, 73–74
- Peatlands, 73–74
  - restoration, 74
- Perth desalination, 93
- Pipe-in–pipe-out urban areas, 124
- Plastic pollution, 28
- Pollutants, 28–29
- Pollution, 121
- Pools, 77
- Pour-flush toilets, 20

- Poverty Alleviation Programme, 106–107
- Practical high bog habitat restoration measures, 80
- Pre-colonial water management, 85
- Quality of ecosystem, 52
- Quic quid plantatur solo, solo cedit*, 115
- Rainfall, 29
- Rainwaterfed ecosystems, 72
- Raised bogs, 71–72
  - experience of
  - restoration in Europe and Latvia, 74–75
  - restoration project, 75–78
- Recycling and reuse of water, 94
- Regional-scale catchment management, 88
- Reservoir capacity, 92
- Restoration of water-related ecosystems, 53–56
- Rio Declaration, 35
- Riparian, 85
- River
  - catchment, 35–36
  - river-wide basin planning, 59
  - systems, 99
- River Basin Development Authorities (RBDAs), 105, 111
- River Basin Development Authority Act, 112
- Rožu Mire, 76
- Rural Development Policy, 106–107
- Rural Water Supply Agency Law 1991 of Cross River State, 107
- Rural Water Supply and Sanitation Agency, 107
- Safely managed sanitation service, 11
  - of WASH, 18–20
- Saltwater intrusion, 101
- Sanitation, 9, 20, 27, 45
- Scheme of Service of Local Government Staff, 107
- SDG 6 Synthesis Report 2018, The*, 67–68
- Southeast Queensland, 93–95
- Sphagnum*, 72
- Sphagnum cover, 80–81
- State Water and Sanitation Agencies, 105
- Surface water bodies, 101
  - purchases, 90

- Sustainable development,
  - 12, 35, 60, 61, 87,
  - 112, 116, 119, 122
- Sustainable Development Goals (SDGs), 2–4,
  - 31–32, 43–44
  - SDG 1, 12
  - SDG 2, 12
  - SDG 3, 12
  - SDG 6, 1, 4–7, 34–39,
  - 63, 121–123
  - SDG 6.6, 47–56
  - SDG 6A and 6B, 60–64,
  - 66–68
  - SDG 8, 12
  - SDG 10, 12
  - SDG 15, 12, 52
- Sustainable extraction, 89–92
- Technical/engineering
  - approaches, 92
- Terra Nullis*, 85
- Tireju Plain rich in
  - bogs, 76
- Transboundary water
  - management, 59, 61
- Transparency
  - International, 65
- Traveston Dam in
  - Queensland, 93
- UN Administrative
  - Committee on
  - Co-ordination Inter-
  - Secretariat Group
  - for Water Resources
  - (ACC/ISGWR),
  - 34–35
- UN Joint Monitoring
  - Programme for
  - Drinking-water,
  - Sanitation and
  - Hygiene, 68
- Unharmed raised bogs in
  - Latvia, 74
- United Nations
  - Environment
  - Program (UNEP),
  - 25, 47
- Universal access of WASH,
  - 18–20
- Upper Benue, 99
- Urban water
  - management, 83
  - scarcity and efficiency in
  - Australia, 92–96
- Urbanisation, 28
- Vegetation typical of bogs, 75
- Virtual water, 37
- Vulnerable situations, 2,
  - 11, 14, 22–23
- WASH components under
  - SDG 6, 12–13
  - adequate access, 14–17
  - affordability, 17–18
  - drinking water, 13–14
  - equitable access of
  - WASH, 22–23
  - equitable access and
  - in vulnerable
  - situations, 22–23
  - special attention to
  - needs of women
  - and girls, 21–22

- universal access and safety, 18–20
- Wastewater
  - recycling plant, 94
  - reuse, 30
  - treatment technology, 27–28
- Water, 9, 42
