Index

Acceleration/accelerating learning, 1, 5, 9–10, 14, 45, 103, 114
Achievement data (see also Valued student outcomes)
   analysis of, 46–54
   in the phases (case study), 25–31
   and student learning, 34–35, 39
   and valued student outcomes, 39
Agreed evaluation criteria, 24, 38, 41–42, 56, 60
Capability, 1, 4, 9–10, 33, 75, 83, 114–115
   Capability building, 58–59, 88–89
Co-designed solutions (see also Partnerships for design and sustainability), 40–41, 57
Collaborative analysis of data, 14, 37, 95
   artefacts for, 54–55
   caveat, 55–56
   principles for data analysis and use, 45–54
   principles for data collection, 42–45
   process and cycle, 38–42, 78–79
   rationale for, 22–25
Content-area knowledge, 23, 28, 42, 46, 55–56, 67, 112
Contextualisation, 17–22, 24, 39, 53, 58
Cultural expertise, 61, 71
Data (see also Achievement data and Collaborative analysis of data)
   Data literacy / skills for data analysis and use, 24–25, 69–70
   Definition, 13
Design-based research (DBR), 7, 11–12, 31–32, 77, 87, 100–102
   DBR-type approaches, 12, 15, 22
Feedback loops, 13, 82, 113
Inquiry, 22, 30, 79, 95, 97
   Leading inquiries: Reporting template, 91–92
Knowledge (see also Pedagogical content knowledge (PCK) and Content-area knowledge), 1, 9, 18–19, 23, 110
   for collaboration, 67–71
Learning Schools Model (LSM), 1, 12–15
   case studies, 25–31
   contribution to improving valued student outcomes and achievement, 11–12, 14–15
   contribution to methodology, 99–106
   contribution to theoretical knowledge, 106–109
   Key concept 1: Contextualisation of effective practice to local contexts, 17–22
   Key concept 2: Collaborative analysis of data, 22–25
   Mechanisms for learning, 109–113
   NZ context and affordances, 32–35
   Phase 1: Profiling, 12–13, 26–28
   Phase 2: Resourcing, 13, 28–30
   Phase 3: Sustainability, 13, 30–31, 89–92
sequence, 31–32
What we still need to learn, 114–115

Partnerships for design and sustainability (see also PLCs), 57–58
knowledge and skills for collaboration, 67–71, 111–112
PLCs, 61–64
principles, 59–61
purposes and roles, 58–59
research into PLCs, 64–67
Pedagogical content knowledge (PCK), 28, 42
teaching expertise and, 67–68
Practice-embedded research approaches (see also Design-based research), 7–8
reasons for, 8–10
types of, 7
Professional learning and development (PLD), 6, 13, 21, 28–29, 31, 37, 73, 86
to improve teaching practices, 74–75
key principles, 75–79
model: cascading structure, 81–85
Professional learning communities (PLCs), 11–13, 22–25, 33
example in the phases, 25–31
example of structure, 65–66
PLD in, 79
across-school sites, 63–64
within-schools sites, 63
setup, 61–62
structure and focus, 62–63
Profiling, 12–13
Examples of, 26–28, 46–54
before resourcing, 75–76
Randomised control trials (RCTs), 3, 9, 15, 35
counters and criticisms, 100–102
Replication, 3, 9, 101, 103–104, 106
Resourcing, 13, 28–30, 73
as bespoke, 80–81
different forms of, 85–86
PLD as, 73, 75–79
Scalability, 1–4, 9, 11, 114
School leaders
and the collaborative analysis of data process, 22–24, 40–41
in the phases (case study), 25–31
in PLCs and partnerships for design, 58, 61–64, 69
and PLD, 13, 83–84, 95
and sustainability, 88, 89, 93–94
Sustainability, 1, 6, 9–10, 30–31, 32, 87–88
developed through the LSM, 89–92
importance of, 88–89
issues, 96–97, 102
research into, 92–96
Teachers (see also Teaching)
and the collaborative analysis of data process, 22–24, 40–41
in the phases (case study), 25–31
in PLCs and partnerships for design, 58–59, 62–64
and PLD, 13, 76–78
and sustainability, 88, 89–90
Teaching
data analysis, 49–54
expertise and PCK, 67–68
practice artifact, 54–55
Valued student outcomes, 38–40, 61–62, 88
improvement of, 11–12
and student learning and achievement, 39, 54
Variability, 1–4, 9–10, 20–21, 31, 33, 47, 50, 100–101, 114
