

LONDON TRANSPORT

Frontiers of Management History

Edited by Dr Kevin D. Tennent, University of York, UK and Dr Alex G. Gillett, University of York, UK

Frontiers of Management History focusses on new and emerging scholarship on management history, presenting innovative methodological approaches to studying history, and new or disruptive ways of thinking about and theorising management and business history. The books within the series combine the craft of the business historian with the methodology of the social scientist, to offer interdisciplinary perspectives on the management history field, alongside theories, frameworks, critiques and applications for practice. Featuring a wide range of theoretical, empirical and historiographical contributions concerned with organisations from various sectors, the series creates a new space in which to engage a new generation of historians and social scientists, to contribute to the future direction of business, organisational and management history.

LONDON TRANSPORT: A HYBRID IN HISTORY 1905–1948

Acknowledgements

The content of this book greatly benefitted from the advice of Dr Kevin Tennent, Professor Richard Common, Dr Alex Gillett and Dr Roy Edwards over a number of years. The support of the Transport for London archive and the London Transport Museum library have also been of critical importance in providing the material on which this book relies and I am very much indebted to them. Finally, I am also very grateful to Kevin and Alex for inviting me to contribute to this series.
