Index

ABI/INFORM, 19
Absolute fit indices (AFI), 270–272
Academic socialization of scholars, 2
Academy of Management (AOM), 3, 19, 22
Action research tradition, 4–5
Active listening skills, 87, 89
ADB Perceptions Survey, 69
Adjusted Goodness-of-Fit Index (AGFI), 273
Affective research, 156
Alternative hypothesis ($H_1$), 129, 133–134, 205, 217
Amazon Alexa, 172
American Psychological Association (APA), 21
Amrita (nectar for immortal life), 153
Analysis of covariance (ANCOVA), 42, 45
Analysis of variance (ANOVA), 42
hypothesis for, 132–133
one-way, 112
Analyst triangulation, 175
Analytic generalizations, 173
Analytic hierarchy process (AHP), 226
analytic network process, 233
consistency of priority weights, 231–232
decomposing problem into hierarchy, 227
dedicated software packages, 233
extensions to basic, 232–233
fundamental scale, 228
group decision-making, 233
hierarchy of goal, criteria, and alternatives, 228
levels of criteria, 232–233
paired comparison, 228–231
priority weights for criteria, 227, 229–230
ratio scale of measurement, 227–228
synthesizing priorities, 231
weighted average method of decision-making, 226–227
weighted average scores for alternatives, 231
Analytic network process, 233
Analyzing interview, 83
Anganwadi Centers (AWC), 128
Annual Survey of Industries, 279
Antecedent set of factor, 223
Apprehensive subjects, 47
Appropriate research strategy, 155
Appropriateness of focus groups, 94–96
Archival data, 170
Artifacts, 170
in behavioral research, 45
Asynchronous data collection, 105
Attributes of writing good questionnaire, 66–67
Autonomous enablers, 224
Average variance extracted values (AVE values), 256, 274
Axial coding, 188, 190–191
Badness of fit index (BOF index), 254
Banker, Charnes, and Cooper model (BCC model), 245–246
Bartlett’s test of sphericity, 252
Bayesian hypothesis, 34
Before–after design (see Pretest–posttest design)
Bharat Sanchar Nigam Limited (BSNL), 111
Biased questions, 87
Biosocial effect, 47
Body language expressions, 104
Bombay Stock Exchange (BSE), 285–287
Boyle’s law, 41
Bricolage, 152
Buyer behavior, 121

Campus-placements and On-job-probation, 138
Case study protocol and database, 174
Case study research, 163
case study elements, descriptors, and focus of researcher, 165
components of case study design, 166–170
framework for assessing quality in qualitative case study research, 175–176
judging quality of, 173–175
methodological issues in case research, 173
perspectives on, 164
qualitative analysis in, 171
structuring case study, 171–172
Categorizing strategy, 187–190
Category card, 196
Cause-and-effect explanation, 49
statement, 40–41
Center of Creative Leadership, 89
Centre for Monitoring Indian Economy database (CMIE database), 286–287
Chain referral sampling (see Snowballing sampling)
Charles’ law, 41
Charnes, Cooper, Rhodes model (CCR model), 236–238
efficiency, 238, 240–241, 244
Charts, 171
Chi-square to degrees of freedom ($\chi^2$/df), 274
Chi-squared tests ($\chi^2$ tests) (see also Kolmogorov–Smirnov tests (K-S tests)), 115, 132, 204, 271
for contingency coefficient, 209
multi-sample, 208–209
one-sample, 204–205
related-sample, 207–208	
two-sample, 205–207
Close-ended questions (see also Open-ended questions)
formal standardized questionnaires/structured questionnaires with, 55–56 in questionnaire, 65
Closed, fixed-response interview, 82
Closing questions, 63
Cluster analysis, 120–122
Clustering, 196
Code notes, 192
Coding, 185–190
for GT, 185–190
paradigm, 196–197
Coefficient of multiple determination ($R^2$), 117
Coefficient of variation, 114
Cognitive and affective component of destination image, 263
Cognitive dimension, 264
Cohert, 39
Collective case study, 167
Color coding, 64
Column names, 288
Column percentage, 115
Community gatekeepers, 101
Comparative Fit Index (CFI), 272
Comparative scaling, 110–111
Composite index, 279
Composite reliability (CR), 256, 274
Comprehensive Meta-analysis, 15
Conceptual clarity/building theories, 158
Conceptualization of review, 16
Conditional matrix, 189–190
Conduct of experiment, 42
Confidentiality issues, 105–106
Confirmatory factor analysis (CFA) (see also Exploratory factor analysis (EFA)), 118, 250, 274
establishing construct validity,
253–257
measurement model after deletion
of items, 255
Confounding variables, 44, 49
Conjoint analysis, 122–123
Consent seeking, 98
Consistency index (CI), 232
Consistency of priority weights,
231–232
Consistency ratio (CR), 232
Constant comparison, 193–195
Construct validity, 174, 251–252
CFA to establishing, 253–257
Constructs, 33
Consumer behavior literature, 262
Context, Conditions, Causes,
Consequences, Covariance,
Contingency coding
paradigm (6-C coding
paradigm), 189
Contextual factors, 96
Contextual performance (CP), 250, 257
Contingency coefficient, chi-square
for, 209
Continuous measures, 110, 113
Control group, 42
Control of causal factor, 41
Convenience sampling technique, 250
Convergent validity, 274
of constructs, 256–257
Corbin’s coding paradigm, 189
Correlation of constructs, 251
Correlational design, 49–50
Covariance and correlations, 112
Cramer’s $V$, 115
Credibility in qualitative research,
174–175
Credible research, 156
Credulous subjects, 47
Critical analysis, 18
of literature, 16
Critical management researchers, 94
Critical region, 133–136
Cronbach’s coefficient for constructs,
264
Cronbach’s $\alpha$, 251, 256, 264
Cross-loading of items, 250
Cross-sectional design, 39–41
Cross-tabulation, 115
CSPro Software, 69
Culmination of literature review, 18
