## About the Editors

**Associate Professor Naomi Birdthistle** has entrepreneurship in her blood. She worked in her family business for over 20 years, which is the largest indoor funfair in Europe. On leaving the family business she ran her own consulting business, where she consulted family businesses on management issues. Naomi's passion for family business management and entrepreneurship is evident by her research outputs. She wrote the first ever PhD on family businesses in Ireland which won the Family Firm Institute's 'Best Doctoral Dissertation Award'. She has published 32 peer-reviewed papers, five books, 18 book chapters, 63 conference papers and an abundance of national and European reports. Naomi's research covers many areas within the entrepreneurship and family business discipline including the following: entrepreneurship education, minority groups and entrepreneurship; women owned and led businesses; succession planning in family businesses; divorce and family business and the role women play in family businesses. Naomi supervises PhDs around women entrepreneurship, family business management issues and high growth firms.

**Dr Rob Hales** is the Director of the Griffith Centre for Sustainable Enterprise in the Griffith Business School at Griffith University. The Centre oversees the sustainability strategy and initiatives of the Griffith Business School. He is the Co-chair of the Griffith University's Sustainable Development Goals (SDGs) Working Group which oversees the SDG Strategy and Times Higher Education Impact ranking processes of the university. His research interests focus on the governance issues around the grand challenges of our time. His research focusses on SDGs in business and government, a business case for climate change, climate change policy, carbon management, sustainable tourism and working with First Peoples on consent processes and climate change. He created and was the first program director of Griffith University's Master of Global Development. He teaches in the Department of Business Strategy and Innovation and has convened master's level courses such as Leadership for Sustainable Business, Research Methods for Policy Makers and Sustainability and Systems Thinking. He supervises PhD students in the areas of collaborative governance, sustainability transitions and climate change.

## About the Contributors

**Dr Sofiane Baba** is Assistant Professor of Strategic Management at the University of Sherbrooke in Québec, Canada. His research focuses on the organization–society nexus from a variety of theoretical perspectives and research interests, mainly related to institutional change, sustainability and strategic management. His work has received best paper awards and is published in leading peer-reviewed journals. He holds a Master of Science in Strategy and a PhD in Organizational Theory and Strategy from HEC Montreal.

**Dr Mary Barrett** recently retired as Professor of Management in the School of Management and Marketing at the University of Wollongong. She now holds an honorary research professorship there. She has published extensively on business communication, family business, gender in management and entrepreneurship.

**Dr Omar Hemissi** is a Professor at the École Supérieure de Commerce of Algiers. He graduated from the National School of Administration (Algeria), holds a Master's in Finance and a Doctorate in Management Sciences. His research focuses mainly on issues related to change management, governance and growth strategies. His publications focus on both the public sector and family businesses, largely in developing countries. He also acts as an expert and consultant to various organisations.

**Emeritus Professor Ken Moores** was Founding Director of the Australian Centre for Family Business at Bond University where he previously held positions of Vice-Chancellor and President, Dean of Business and Professor of Accounting. His research in accounting, education, management and family business has been published internationally across these disciplines.

**Dr Markus Pillmayer** is Professor for Destination Management and Destination Development at the Department of Tourism at the Munich University of Applied Sciences. His research focuses on spatial development which he has explored in several contexts including citizen participation, health and sustainability. In the context of his PhD – funded by the German Research Foundation (DFG) – he dealt with internationalisation processes of the tourism industry in the Arab World. He can draw on many years of experience in the international tourism industry and tourism policy, which also benefits him in the context of his scientific activities. In addition, he is a fellow of various scientific associations such as IGU

(International Geographic Union) or the DGT (German Association for Tourism Research), in the latter also serving on the board.

**Kyoko Sasaki** is a Doctoral Student at Monash University in Australia. Her research focuses on the relationship between corporate purpose and companies' actions on the UN Sustainable Development Goals (SDGs). She started her career in the early 2000s as an environmental consultant in start-ups in Japan, supporting the development and implementation of environmental and recycling policies and publishing environmental reports for Japanese companies. Other work included research into recycling issues for the national and local governments in Japan. She has also worked as a sustainability manager for a large multinational company, where she led various global projects, including the launch of the company's CSR initiative and the publication of its sustainability report. She has a Bachelor's Degree in Agricultural Sciences and a Master's Degree in Environmental Studies.

**Dr Nicolai Scherle** is Professor for Intercultural Management and Diversity at the Hochschule für Oekonomie & Management (FOM) in Munich. His research interests are mainly in the areas of economic and tourism geography with emphasis on sustainability issues, entrepreneurship, intercultural communication and diversity. As a cultural geographer he has been involved in several national and international research projects, mainly focusing on internationalisation processes of the tourism industry. He is fellow of the DGT (German Association for Tourism Research) and the Royal Geographical Society.

**Amina I. Wazoumi** is a Doctoral Candidate at the business school of the Université of Sherbrooke. Her research topic focuses on strategic change in philanthropic organisations in Quebec, which regularly face challenges related to the constantly changing environment. Amina holds several university degrees in law, finance, accounting and administration obtained in Africa and France. She has been working at the Ministry of Finance and Budget of Chad since July 2006. She has held several positions of responsibility, including head of the department in charge of accounting, head of the IT project management unit, head of the division of studies and financial and accounting regulations, head of the inspection of Treasury services and director of the authorisation of operating and investment expenses at the Ministry of Finance and Budget of Chad.

# Foreword

*Professor Walter Leal Filho*

The Sustainable Development Goals (SDGs) adopted by the United Nations General Assembly in September 2015 provide a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity.

They also entail elements of importance towards a strategic business engagement with sustainability issues. These offer a framework which provides businesses with a systematic approach to identify new business opportunities while contributing to the solution of the grand sustainability challenges facing the world today, including climate change. Each SDG, if achieved, will have a direct and significant positive impact on millions of people's lives around the world and the environment in which they live. Businesses have an opportunity to widen the purpose of business through adopting the SDGs as targets for their operations. Thus, they can make a meaningful contribution to the greater good through achieving their operational objectives.

Family businesses are uniquely placed to contribute to SDGs for many reasons. Firstly, because family business models have longer time perspectives, and this allows the family business to link with the longer-term SDG time frame – 2030. Secondly, family businesses often focus on aspects of business operation which do not have an immediate return on investment such as relationship building with stakeholder groups. Thirdly, family businesses tend to rate the importance of ethics higher than standard businesses and thus align well with the social dimensions of the SDGs. Lastly, family businesses have intergenerational perspectives which is a core principle of sustainability.

This book provides insights into how family business operationalises SDG#9: Industry, Innovation and Infrastructure. The book uses a rigorous case study approach for family businesses to detail aspects of their business which helps to build resilient infrastructure, promote sustainable industrialisation and foster innovation. The cases provided here are living proof that family businesses that operate for the greater good actually work! Non-family businesses can take a leaf out of the family businesses portrayed in this book as they can provide different perspectives on how businesses can successfully align SDGs and business strategy.

Despite many businesses having adopted environmental social governance strategies and environmental management systems, the effect of this activity has not been reflected in a healthier planet. Many 'state of the environment' reports

indicate that planetary health is decreasing, and planetary boundaries are being crossed or are about to be crossed. Whilst the cause of this decline is not entirely the fault of business, there still needs to be a greater effort to address the decline. The challenge for family businesses is to use their unique characteristics and set ambitious programmes of work that make a meaningful contribution to achieving global goals. This book provides insights into how family businesses can achieve such a mission and how non-family businesses can be inspired to do the same.

# Acknowledgements

The Editors would like to thank the contributors of the book for providing insights and sharing the learnings from their business practice. We acknowledge that writing up cases in the format required considerable time and effort. The quality of the cases presented is testament to their efforts.

The Editors would also like to thank Emerald Publishing for supporting the publication of this book and the mission for deeper sustainability through utilising the SDGs.
