- Agency for the Cooperation of Energy Regulators (ACER), 4
- AIDA database, 114
- Archival research, 91–92, 93
- Business distribution, 118–120
- Cross-sectional studies, 93
- Current assets, 120–132
- Distribution phases, 3, 6
- Distribution System Operators (DSOs), 12
- Electricity and gas market market phases, 57, 70–72 supply chain, 54–57
- Electricity bill, 62
- Electricity directive (EC 96/92), 9
- Electricity generation, 5
- Electricity value chain, 5
- Eligible electricity consumers, 7
- Energy Industry Act (EnWG), 26
- Energy Market Operator, 73
- Energy Metered Accounting Platform, 73
- Energy sector reform, 5
- Energy Services Operator (GSE), 66–68
- European Coal and Steel Community (ECSC), 2
- European energy directives, 21–22
- European energy markets characteristics, 32–34 co-operation, 1 distribution and transmission phases, 3, 6 electricity, 2, 4, 5 electricity and gas companies, 37–43 electricity and gas retailers, 43 electricity value chain, 5

- energy sector reform, 5
- first energy package, 6–10
- fourth energy package, 16–20
- liberalization processes, 2, 4, 20–23
- natural gas, 2, 4
- network externalities, 3
- sales phases, 3
- second energy package, 10–13
- third energy package, 13–16
- Transmission System Operator (TSO), 8
- European Network for Transmission System Operators for Gas (ENTSO-G), 14
- European Union Internal Energy Market (EU-IEM), 13
- Financial performance
 - business distribution, 118–120
 - deregulation, 111
 - financial statements
 - indices, 102–105
 - gas price changes, 105–106
 - indices analysis, 120
 - liberalization, 111
 - methodology, 101–102
 - oil price changes, 105–106
 - privatization, 111
 - public policy, 98
- Financial statements
 - indices, 102–105
- First energy package, 6–10
- Fourth energy package, 16–20
- Free market, 59
- Gas directive (EC 98/30), 9
- Gas price changes, 105–106
- Grounded theory, 91–92
- Guarantee of Origin (GO), 67
- Independent national
 - regulatory
 - authorities, 12
- Independent System
 - Operator (ISO), 15
- Independent Transmission
 - System Operator (ITSO), 15
- Indices analysis, 120
 - current assets, 120–132
 - intangibles assets, 132–140
 - non-current assets, 120–132
 - profitability analysis, 140–147
- Intangibles assets, 132–140
- Interpretivism, 87–88
- Italian energy markets
 - crude oil production, 53
 - electricity and gas
 - market phases, 57, 70–72
 - electricity and gas supply chain, 54–57

- electricity production
 - from renewable sources, 52
 - energy bill, 60–62
 - geographical distribution
 - of oil reserves, 54
 - independent regulatory authorities, 46
 - institutional actors, 63–70
 - primary objective, 46
 - production, 48–54
 - regulated market, 58–60
- Liberalization processes, 2, 4, 20–23, 111
 - France, 28–30
 - Germany, 25–28
 - Spain, 30–32
 - UK, 23–25
- Natural gas, 2, 4
- Non-current assets, 120–132
- Oil price changes, 105–106
- Over-the-counter (OTC), 73
- Philosophy, research
 - interpretivism, 87–88
 - positivism, 84–86
 - pragmatism, 88–89
 - realism, 86–87
- Positivism, 84–86
- Pragmatism, 88–89
- Privatization, 111
- Profitability analysis, 140–147
- Protected market, 59
- Public policy, 98
- Realism, 86–87
- Regulatory Authority for Energy, Network and Environment (ARERA), 69
- Regulatory Authority for Energy Networks and the Environment (ARERA), 63
- Research methodology
 - as an onion, 82–83
 - data collection, 93–94
 - definition, 79
 - grounded theory, 91–92
 - philosophy, 83–84
 - strategy, 90–91
 - time horizon, 92–93
- Safety Oil Stock Management Organization (OCSIT), 64
- Second energy package, 10–13
- Third energy package, 13–16
- Third Energy Package*, 4
- Third party access system, 8
- Time horizon, 92–93
- Transmission phases, 3, 6
- Transmission System Operator (TSO), 8
- Virtual Trading Point, 74
