

INDEX

- Accountability principle, 183
- Age, demographics effect, 130–132
- Anonymous interaction, grid and group for behavior in, 96
- Anthropology, 13, 66
 - cultural, 91
- Apartheid laws, 230
- Archetypal analysis (AA), 65, 69, 73
 - advantages and limitations in comparison with methods, 72–73
 - algorithm, 70–71
 - associating individual cases with archetypes, 71
 - comparison of AA with methods, 71–72
 - determining number of archetypes, 71
 - measurement of Schwartz values, 74–76
 - Schwartz values model, 74
 - World Values Survey (WVS), 73
- Archetypes, 14, 68
 - culture, 65, 68–69
 - from data, 69–73
 - distribution of archetypal cases, 80–81
 - for Japan and United States, 82
 - for Jordan, France, and South Korea, 82
 - multiple, 69
- Archival social history, 28, 37
- Backlash-aversion/social capital investment function, 210
- Beliefs, 4–5, 30
 - on luck, 177–180, 201
 - variable, 173
- Blameworthiness, 208
- Bonus framing effects, 220–221
- Capital, cultural, 28, 30
- Capitalism, 41
- Case studies, in-depth, 28, 37
- Catholic, 34
- Chat communications, 57
- Citizenship
 - demographics effect, 130–132
 - experimental participants by, 108–109
- Cluster analysis, 72
- Collectivism, 4, 30–31, 91–92
- Collectivist culture, 2
- Collectivists, cultural type, 97
- Computer program matching algorithm, 254
- Conceptualization of culture, 29, 38–40
 - as form of capital, 30–33
- Configuration of values, culture as archetypes from data, 69–73
 - culture archetypes, 68–69
 - five global archetype profiles, 77–78
 - global archetypes, 65
 - homogenous group, 66–67
 - illustration of archetypal analysis, 73–76
- Contemporary social anthropology, 90–91
- Content analysis, 58
- Convex ultimatum game, 100, 116–119, 126–127, 163–164

- effects of grid and group alternate measures on behavior, 134–135
 - one-role treatment, 152–153
 - two-role treatment, 158–159
- Coordinated social interaction, 74
- Corporate culture, 46
- Cross-cultural
 - difference, 169, 182–184
 - experimental studies, 37
 - experiments, 170
 - psychology approach, 91, 137
 - studies, 10
- Cross-ethnic difference, 90
- Cross-national analysis, 5
- Cross-national difference, 90
- Cultural capital, intangible, 27–28
- Culture
 - patterns, 67
 - static, 35–36
- Culture-related economics literature, 64
- Decision-making, 228
 - heuristics, 3
 - processes, 64
- Decontextualized experiments, 216
- Delegated decision-making, 228, 230
- Demographics, 241
 - effect, 130–132
 - by race group, 254
- Desert preferences, 207
- Desert-utility function, 209, 210
- Dictator game, 8–9, 14, 16, 43,
 - 90–91, 100, 102, 124, 163, 185n11, 207, 212, 216, 242
 - age effect in meta-analysis, 132
 - anonymous dictator-game experiment, 210
 - donations in, 125, 131–132, 140n28
 - effects of grid and group alternate measures on behavior, 134–135
 - experimental design, 101
 - hypothesis, 54, 102, 105–106
 - modified, 185
 - one-role treatment, 150–151
 - regression estimation of decisions, 114–115
 - two-person, 175, 183
 - two-role treatment, 156–157
- Differences, cultural, 206
- Discrete uniform distribution, 171
- Distribution of cultural types, 107–108, 110–111
- Distributionists, cultural type, 97
- Diverse societies, experiments across, 8–10
