

# Index

NOTE: Page numbers followed by 'f' and 't' refers to figures and tables in the text.

- Absence seizure (petit mal), 204
- Academic interventions
  - curriculum, 57, 59, 62–64
  - evidence-based, 60–61*t*
  - mathematics instruction, 63–64
  - reading instruction, 59, 62
  - science education, 64
  - writing instruction, 62–63
- D/HH
  - for early childhood, 85–86
  - for elementary students, 87–89
  - for secondary students, 90–92
- Acquired immune deficiency syndrome (AIDS), 197, 208
- Advocacy groups, 6
- The American Psychiatric Association (APA), 128
- American Sign Language (ASL), 80, 87–88, 90–92
- The American Speech-Language-Hearing Association (ASHA), 184
- Asperger disorder, 128
- Assistive Technology (AT) certification, 119–120
- Asthma, 206
- Ataxic cerebral palsy, 210
- Athetoid cerebral palsy, 209
- Attention deficit hyperactivity disorder (ADHD), 172, 174, 180
- Augmentative and Alternative Communication (AAC), 93–94, 133–134
- Aura (warning sensation), 205
- Autism spectrum disorder (ASD), students with, 6, 93, 128
  - evidence-based interventions for, 130*t*
  - language and communication support, 129, 131–134
    - AAC, 133–134
    - expressive language, 132–133
    - receptive language, 131
  - restricted patterns of behavior, interests, and activities, 137–140
    - repetitive behaviors with anxiety, 139–140
    - repetitive motor behaviors, 139
    - routines and rituals, 138–139
    - self-injury, 140
    - special interests, 137–138
  - social supports, 134–137
    - peer, 134–135
    - strategies for inclusive classroom, 136–137
    - video modeling, 135–136

- Backtranslation, 118
- Braille Authority of North America (BANA)  
research project, 118
- Braille code transition, 117–119  
to address well-established problems, 118–119  
changes with braille, 117–118  
changes with print, 117
- Brown v. Board of Education of Topeka* (1954) case, 225
- Career education, 108
- Centers for Disease Control and Prevention (CDC), 170
- Cerebral palsy, 198, 208–210
- Certified Assistive Technology Instructional Specialist (CATIS), 120
- Classroom-based research, 8
- Classroom-based speech  
pathology services, 184  
interventions, 189–194  
models, 187–189
- Coached elaboration technique, 43–44, 45*t*
- Cochlear implants, 76
- Cognitive disabilities, 5–6
- Collaboration for Effective Educator, Development, Accountability, and Reform (CEEDAR) Center, 82
- Collaborative Strategic Reading (CSR), 20, 24
- Common Core Curriculum, 121–122
- Common Core State Standards (CCSS), 121
- Communication skill development, D/HH, 93–94
- Community support systems, 95
- Compensatory skills, 108
- Complex partial seizure (psychomotor), 204
- Computer-based instruction/interventions, 67, 134
- The Computer Braille Code, 118
- Concussions, 171–172
- Constant time delay intervention, 59
- The Council for Exceptional Children, 6
- Cued Speech, 80, 88  
for American English, 81*f*
- Culturally and linguistically diverse (CLD) students, 222–223
- Cystic fibrosis, 207
- Deaf/hard of hearing (D/HH)  
with additional disabilities, 93–95  
communication skill development, 93–94  
life-skill development, 94–95  
degrees of loss and possible implications, 77–79*t*
- DWD students  
communicating with, 93  
curriculum used with, 94  
vocational training for, 94
- EBPs, 82
- education/educational practices, 2, 82–83
- hearing aids/cochlear implants, 76
- modes of communication, 80
- recommended practices, 83–92  
for early childhood, 83–86  
for elementary students, 86–89  
principles for FCEI, 85*t*

- for secondary students, 89–92
- Deaf with Disability (DWD), 93
- Deficit-based diagnostic model, 149
- Diabetes
  - diabetic coma, 206
  - hyperglycemia, 206
  - hypoglycemia, 205–206
- Differentiated instruction, 153
- Disability-specific skills, 108, 112
- Duchenne muscular dystrophy (DMD), 210–211
- Early Hearing Detection and Intervention (EHDI) programs, 83
- Ecological assessment, 149
- Educational literacy interventions, 62
- The Education of All Handicapped Children's Act (PL 94-142), 144, 225
- Educators, 212, 228
  - ASD, 138–139
  - dual responsibility, 7
  - explicit instruction, 22–23
  - preparation programs, 230
  - and professional development providers, 26
  - secondary, 89, 91
  - TBI. *See* Traumatic brain injuries (TBIs), role of educators
  - teacher, 230
- Effective instruction, 15, 20, 25
- Embedded trial instruction, 59
- Emotional and/or behavioral disorders (EBDs), 32
  - achievement and services provided to students with, 36–37
  - disappointing outcomes, 36
  - other studies, 37
- challenges for completing secondary education, 39–47
  - discriminating essential from nonessential information, 40–41
  - expressing one's learning, 46–47
  - organizing target information, 43–46
  - recalling target information, 41–43
- Andrew F.* case implications, 35–36
  - government actions, 34–35
  - instruction for students in secondary schools, 37–39
  - power vs. duties, 32–33
- Emotional disturbance, 6
- Andrew F. v. Douglas County School District* case, 35–36
- Epilepsy, 200, 204–205
- Every Student Succeeds Act (2015), 155
- Evidence-based interventions, 58–67
  - academic curriculum, 57, 59, 62–64
  - evidence-based, 60–61*t*
  - mathematics instruction, 63–64
  - reading instruction, 59, 62
  - science education, 64
  - writing instruction, 62–63
- life-skills curriculum, 57
  - computer-based interventions, 67
  - evidence-based, 66*t*

- self-operated prompting
  - systems, 65, 67
  - systematic instruction, 65
  - video-based instruction, 65
  - visual activity schedules, 65
- Evidence-based practices (EBPs), 16, 26, 37, 82
