

References

Titles of items published in languages other than English are generally given in English translation in square brackets. Authors who have published under slightly varying forms of their names – J. P. Dunne/J. Paul Dunne/Paul Dunne is a case in point – are generally cited under a single form of the name, to avoid confusion. In the list of references we have used the term Statistics Norway for Statistisk Sentralbyrå, although the English name of that agency until recently was Central Bureau of Statistics. The same may be the case for other organizations which have changed their name.
