

# INDEX

- Academic Entitlement Scale, 125  
Accountability, 21–22, 29–30  
Affect control theory (ACT), 82–85  
    emotions and, 83–84  
    and interact, 84–85  
    planned simulations, 85  
Affluenza teen, 121  
Alter-casting individuals, 50  
Amazon Mechanical Turk (mTurk),  
    121–122  
Anderson, Cameron, 2  
Anxiety/uncertainty management  
    (AUM) theory, 64  
Assumption, 52–53  
Attributional confidence, 64  
Authority figures, 117–118  
Authority leniency, 117–118  
    consequences of increased  
        entitlement, 126–129  
    consequences of strictness,  
        118–120  
    entitled person, behavior of,  
        126–127  
    entitlement, 120–121, 129–133  
    fairness of authority figure,  
        132–133  
    general entitlement to positive  
        outcomes, 124–126  
    group members reaction, 127–129  
    limitations, 133–134  
    subordinate entitlement to  
        leniency, 121–124  
Autocratic leader, 68  
Average performances, 22–23  
  
Basic norm of status, 6  
Behavioral complementarity, 101  
Behaviors, self-stigma, 86–88  
  
Cognitive and behavioral  
    uncertainty, 64  
“Common in-group identity”  
    model, 31  
“Common knowledge”, 7  
Communication  
    scholars, 63, 64  
    and social identity, 65  
Competence  
    assumed levels of, 20–21  
    and attributes, 21  
Competence-standards  
    setting and scope conditions, 22–23  
    status and competence, 20–21  
    status and rewards, 21–22  
Complementarity, 101–103  
Complex instruction, 32  
Computer simulations,  
    self-stigmatization, 91  
Confidentiality, 29–30  
Consensual normative standards, 63  
Consensus, 10–11  
Contrast sensitivity task, 30  
Controls and self-stigma, 89  
Cooperation, 96, 101  
Cooperative behavior, 103–104  
Cooperative interdependence, 6  
Cultural beliefs and  
    self-stigmatize, 80–81  
Cultural contexts, 2  
Cultural hegemony, 2–3  
Culturally-based stigma, 81  
Cultural schema approach, 9–10  
Cultural schema of status, 3–6  
    broad range of status rankings,  
        9–10  
    governing, 10–11  
    and stability, 11–12

- Cultural status beliefs, 6, 7
- Cultural stereotypes, 82
- Cultural stigma, 90
  
- Deference relations, 4–5
- Democrats, 68
- Demoralization, mental health
  - patients, 81
- Depressed entitlement effect, 50–51
- Difference oriented communication (DOC), 70
- “Direct” relevance, 55
- Distinctive identities, ingroup, 69
- Distributive-justice, 21–22
  - formulations, 21
  - principle, 21
- Dominance, 4
- Dominators, 6
- Double-standards for competence, 23–28
  - average-level performers, 27
  - credibility and dynamism, 27
  - equivalent qualifications, 25
  - gender as a status factor, 25
  - level-of performance
    - differences, 26–27
  - man-woman pairs working together, 25
  - masculine task, 25
  - performance level, 25
  - reverse, 26–27
  - sex and age, 25–26
  - status variable, 24–25
  - strategies
    - accountability, 29–30
    - overall similarity across performers, 30–32
    - single, assigned status-factor, 32–33
  - suitability and choice, 26–27
  - task’s sex-linkage, 25
- Drum beat evaluation, 105
- Drumming, 103, 104–105
- Durkheimian solution, 96–97, 98, 99
  
- Durkheim’s theory, 101, 110
- Dyadic rank response, 9
  
- Echo chamber, 72–73
- Education and testing, status effect, 48
- Effective communication, 64
- Ego-centered situation, 9
- Emergence of cultural norms, 5–6
- Emotional attachments, 98–99
- Emotions
  - and ACT, 83–84
  - self-stigma, 88
- Entitative groups, 66
- Environmental engineering, 29
- Ethnolinguistic identification and linguistic landscapes, 71
- Evaluation, potency, and activity (EPA), 83, 87, 88, 89
- Evolved hierarchy, 4–6
- “Expectation effect”, 54
- Expectation states, 10, 20, 21
  - vocabulary, 29
- Experimental games, 103
- Experimental social psychologists, 134
  
- Factorial survey method, 23
- First-order expectations, 10
- Functionality, 6
- Fundamental sentiment, 82–83
  
- Gender labeling of jobs, 50
- Gender, status effect, 49–51
- Goal-oriented human groups, 5
- Goal-related ability, 11
- Goal-related competence, 6
- Group
  - effervescence, 96–97
  - identity, 12–13
  - memberships, 71
  - members’ performances, 20–21
  - norms, 67
  - prototype, uncertainty reduction, 66

- Hierarchy formation
  - contingency, 5
  - interdependent interests of group members, 5
- Honor and threats to honor, 2
- Human cultural invention, 3
- Human motivations, 2
- Identity-defining role
  - communication, 64
- Identity-related guidance and direction to members, 68
- Immigrants, 72
- Incompatible complexity of task, 49
- Increased entitlement, 126–129
- Independent capacity, 2–3
- Independent variables, 56
- Inequality, 2, 12–14
  - interactional reproduction, 13–14
  - organizational reproduction, 14
  - in organizations, 48
  - in society, 2
- Influence over-group decisions, 47
- Informational justice principle, 21–22
- Information goods, 4–5
- Ingroup leaders, 69
- Ingroup/outgroup distinctions, 29
- Ingroup sources, 62
- Initiative-taking in organizing
  - procedures, 32
- Institutionalized female leader, 31–32
- Intellectual abilities, 49
- Interact and affect control theory (ACT), 84–85
- Interactional reproduction, 13–14
- Interact simulations
  - ACT, 86
  - self-stigma, 86
- Interdependence, 3, 5, 6, 11–12, 15, 97
  - exchange interests, 5
  - interests, 5
- Intergroup
  - attitudes, 2–3
  - dynamics, 2
  - leadership, 68
- Internalization of stigma, 90
- Internally-attributed leniency, 131
- Interpersonal influence, 47
- Interpersonal mechanism, 20
- Interpersonal status hierarchies, 6, 12
- In-the-moment policy violation, 124
- Intra- and intergroup communication, 62, 63, 67
- Leaderless groups, 49–50
- Leadership, competence and suitability, 13
- Leaders role, communication and uncertainty reduction, 67–69
- Leniency
  - disadvantages, 120
  - subordinate entitlement to, 121–124
  - See also* authority leniency
- Lenient authority figures, 120
- Life course identities, 81
- Linear mixed model, 109
  - predicting contribution, 108
- Low status member, views of, 9
- Marginal members and ingroup deviants, 70–71
- Mechanical solidarity, 96–97
- Mediated linear mixed model, 109
- Mediation analyses, 110, 111
- Mental ability test scores, 48
- “Meritocratic” organizations, 13–14
- Misattribution of results, 50
- Mis-attribution theory, 98
- Mixed-sex groups men, 49–50
- Motivational approaches, 96
- Motivational power, 98
- National Institute of Mental Health, 80
- Negative emotional reactions, 102
- Negotiation, 124
- Non-autocratic leader, 68
- Non-egoistic motivation, 96
- Nonverbal power cues, 49–50

- Norm for status, 8  
 Norm talk, 67
- Object-recipient, interact  
     simulations, 86
- Optimal distinctiveness, 102
- Order of performance expectations, 10
- Organic solidarity, 101
- Organizational commitment to  
     diversity, 30
- Organizational reproduction, 14
- Ostracism, 70–71
- People of color or women, 12–13
- People's desire, 2
- Performance expectations, 10
- Performers' status, 24
- Planned simulations, ACT, 85
- Policies, 118–119
- Policy violation, subordinate,  
     118–119
- Prestige, 4–5
- Problem-solving attempts, 47
- Problem-solving task, 32
- Procedural justice, 21–22
- Psychiatric hospitalization, 82
- Psychological entitlement, 118, 120
- Public goods games, 105–106, 107  
     over time, 107
- Punishments, 119
- Race and ethnicity, status effect, 49
- Race-based inequality, 49
- Race/ethnicity, 32
- Racial and gender dynamics, 2–3
- Referent informational influence  
     theory, 67
- Relational cohesion theory, 98–99
- Republicans, 68
- “Reverse” relevance, 55
- Ritual performances, 101
- Rituals and social solidarity, 96–98  
     complementarity, effect of,  
         101–103  
     design, 103–104  
     drumming, 104–105  
     Durkheim's theory, 101  
     generation, 98–99  
     measures, 105  
     participants, 104  
     procedure, 104–106  
     public goods game, 105–106  
     results, 106–110  
     synchrony, effect of, 99–101
- Ritual-solidarity-cooperation  
     theory, 97
- Ritual-solidarity theory, 98–99
- Rule breaking, 134–135
- Sameness, 97
- Second-order expectations, 10
- Second-order performance  
     expectations, 9–11
- Selective incentives, 96
- Self-activity, 82
- Self-categorization theory, 64
- Self-conception, 62–63, 65
- Self-efficacy, 81, 82
- Self-esteem, 82
- Self-evaluation, 82
- Self-interest-maximizing strategy, 103
- Self-potency, 82
- Self-related uncertainty, 62–63
- Self-sentiment, 82
- Self-stigma, 81–82, 85  
     behaviors, 86–88  
     and controls, 89  
     emotions, 88  
     interact simulations, 86  
     self-stigmatized self-identities,  
         85–86
- Self-Stigma of Mental Illness Scale  
     (SSMIS), 91
- Self-uncertainty, 65–66, 68
- Sense of entitlement, 117–118,  
     120–121, 124–125, 128,  
     132, 134
- “Sense of group position”, 2–3
- Sewell, William, 3–4
- Social category, 29

- Social cooperation, 96, 97
- Social difference, 12–13
- Social dilemmas, 96, 103
- Social exchanges, 99
- Social groups, 65
  - discrimination, 22
- Social identity
  - framing theory, 69
  - gratifications approach, 72
  - theory, 2, 64, 67
  - unfreezing, 69
- Social identity-defining attributes, 67
- Social integration, 112
- Social interactions, ACT, 83
- Social justice and categorization, 21
- Social learning, 5–6
- Social order, 98
- Social psychological research, 2–3
- Social solidarity, rituals and, 96–98
  - complementarity, effect of, 101–103
  - design, 103–104
  - drumming, 104–105
  - Durkheim's theory, 101
  - generation, 98–99
  - measures, 105
  - participants, 104
  - procedure, 104–106
  - public goods game, 105–106
  - results, 106–110
  - synchrony, effect of, 99–101
- Social status, 2
- Social system, 21
- Sociology, 98
- Solidarity, 98, 101
- Solidary bonds, 96–97
- Standardized expectation-states
  - design, 24
- Status-advantaged groups, 12–13
- Status allocation, normative schema for, 6–7
- Status-and-double-standards
  - branch, 21
- Status-based different standards, 20
- Status beliefs, 3, 13
- Status characteristic, 10, 20–21
- Status-disadvantaged groups, 12–13
- Status effect, 48
  - education and testing, 48
  - gender, 49–51
  - method, 55–57
  - race and ethnicity, 49
  - results, 57
  - theoretical background, 51–55
    - behavioral model, 54–55
    - graph model of the theory, 53–54
- Status equality, 49
- Status generalization, 9, 49, 51
  - characteristics and expectation states, 52
- Status hierarchies, 3, 7, 10, 11
  - cultural schema, 7
  - functional stability, 9–10
  - interpersonal, 6
- Status situation, 54
- Stigma processes, 80
