

INDEX

- Accounting research, 68–69
Accounting skills, 113–114
Activity Based Costing (ABC), 108
Advances in Environmental Accounting and Management, 4
Africa’s mining sector and CER, 169–170
African Journals Online (AJOL), 162, 164
Agenda 2030, 2, 12, 19, 46, 68
 actualising SDGs through sustainability accounting, 111–112
 factors affecting sustainability accounting practice, 109–110, 121–122
 implementation level of SAP, 117–119
 literature review, 108–112
 measurement of variables, 113–116
 methodology, 113
 multi-stakeholder participation literature for, 48–51
 research design, 113
 response rate, 116–117
 sustainability accounting practice, 108–109
 for sustainable development, 136
 variable measurement and reliability assessment, 132
Australian Federal Act, 85, 91
Australian Modern Slavery Acts, 97
Behaviour-over-time graphs (BOT graphs), 53, 60–61
Bloomberg European 500 index, 141
Bonded labour, 82
Brazil, Russia, India, China, South Africa (BRICS countries), 12–13
 economic potential of, 13–14
 environmental SDG implementation progress in, 32, 34, 38
 outcome of environmental SDG implementation in, 19, 21, 25–26
 sustainability-inclined innovations in, 14–15
Business
 enterprises, 83–84
 strategy, 113–114
California Transparency in Supply Chains Act (CTSCA), 69, 71–72, 76
‘Carbon emissions’, 164–165
Causal loop model, 57
Certification of supply chain, 94
Chartered Institute of Management Accountants (CIMA), 108–109
Chi square test, 119
Child abuse/child labour, 83
Child Labour Due Diligence Law (2019), 97
Civil society actors, 69
Clean water, 143
Climate action, 14, 20, 26
Climate change, 5, 160, 175
Climate Change Vulnerability Index, 20–26
Clusters, 56
CO₂ emissions, 13–14
Coercion, 82
Coercive isomorphism, 75–76
Coercive pressure, 75
Common method bias, 115
Comparative Fit Index (CFI), 119
Competitive position, 109
Competitor Accounting, 108

- Competitor analysis, 109
- Competitor information, 108–109
- Compulsory labour, 82
- Confirmatory factor analysis, 114–115
on sustainability accounting practice, 133
- Consumers, education and training arrangement for, 88
- Content analysis, 5–6, 137–138, 142, 144–145
- Contextual and firm-specific drivers of CER, 171–173
- Contingency management style, 110
- Contingency theory, 110
domestication of, 110
- Controlling community concerns loop, 59–60
- Corporate Duty of Vigilance Law, 86
- Corporate environmental reporting (CER), 160
Africa's mining sector and, 169–170
CER-related research articles, 167–169
contextual and firm-specific drivers of, 171–173
environmental accountability in public sector, 170–171
future research, 173–175
general trends in CER-related research in SSA, 165–169
international organisations and influence on, 171
literature reviews on CER research, 166
methodology, 164–165
origins and development of CER research, 163–164
research articles on CER over period 2008–2017, 165
results, 165–173
searching for quality CER research in SSA, 164
- Corporate governance-related disclosure, 90–91
- Corporate social disclosures, 75
- Corporate Social Responsibility (CSR), 138
reporting, 164–165, 169
- Country-level institutional factors, 136–137
- COVID-19 pandemic, 68
- Criminal Code Act (1995), 70, 81–82
- Cronbach Alpha coefficients, 114–115
- Customer (profitability) analysis (CPA), 109
- Customer information, 108–109
- Customer Patronage, 114
- Debt bondage labour, 82
- Deceptive recruitment for labour or services, 83
- Degrees of freedom, 119
- Deliberate strategy formulation, 108
- Department/Organisation of Accounting Skills
- Descriptive technique, 14, 18
- Determinants of modern slavery, 78
- Disclosure index, 97
with nine principles and 49 sub-principles, 96
relating to water using GRI-303, 157
- Dodd-Frank Act, 76, 84–85, 93
- Domestication of contingency theory, 110
- Due diligence and policy, 85–86
- Ecological dimension of CSR, 165–169
- Ecological footprints (EFs), 169–170
- Ecological information, 160
- Economic development, 2
- Economic growth, 107–108
- Economic performance, 111–112, 114
- Economic potential of BRICS, 13–14
- Education arrangement for consumers and staff, 88
- Effective participation of multiple stakeholders, 48
- Efficacy of actions, 87–89

- amount spent on training, non-compliance penalties and victim support, 89
- education and training arrangement for consumers and staff, 88
- effective tool for key performance indicators measurement, 88
- independent and third-party regular review, 89
- stakeholders' engagement in modern slavery risk disclosure process, 89
- Enforcement, 95
- Entity, 85
- Environmental, social and governance sustainability (ESG sustainability), 141
- Environmental accounting (EA), 163–165
 - in public sector, 170–171
- Environmental development, 2
- 'Environmental disclosures', 164–165
- Environmental Management Accounting (EMA), 108
- Environmental Protection Agency (EPA), 169
- 'Environmental reporting', 164–165
- Environmental SDG, 137
- Environmental sustainability, 19, 68
 - Agenda 2030 by United Nations, 2
 - contributions to special issue, 4–6
 - deepening environmental sustainability knowledge, 3–4
 - knowledge, 3–4
 - performance indicators, 140
- Environmental-related financial information, 108
- Equator Principles, 86
- Exploratory factor analysis, 114–115
 - on sustainability accounting practice, 132
- External communication, 91–92
 - collaboration, 92
 - easily accessible by stakeholders, 92
 - publication of modern slavery statement, 91
- Externalities, 110
- Factor analysis result for SAP, 132–133
 - confirmatory factor analysis, 133
 - exploratory factor analysis, 132
- Federal Act, 82
- Feedback loop analysis, 57–60
 - controlling community concerns loop, 59–60
 - increasing commercial concerns loop, 59
 - increasing community concerns loop, 60
 - polluting roads loop, 58–59
 - populating roads loop, 58
 - roads impacting environment loop, 58
 - traffic induction loop, 58
- Financial quantitative disclosures, 146–148
- Financial Times* Research Rank (FT Research Rank), 164
- Financial-firm premium board companies, 146, 148, 151
- Firm
 - risks, 85
 - size, 124–125
- Forced labour, 82
- Forced marriage, 82
- French Act, 89
- French Corporate Duty of Vigilance Law, 83–84, 86–87
- Global Reporting Initiative (GRI), 87, 108–109
- Globalisation, 68
- Google Scholar, 76–77, 162, 164
- Government consultation, 60–61
- Governments, 69
- Greater Wellington Regional Council (GWRC), 51
- Greenhouse gas (GHG) disclosures, 164–165

- emissions, 2, 161–162
- GRI-303, 145
 - disclosure index relating to water using, 157
 - water disclosure quality using, 149–151
- Grievance redress mechanism, 87
- Group model building, 51, 55
- Hexagons, 55–56
- High-Level Political Forum on Sustainable Development (HLPF), 36–37
- Holistic approach, 47
- Human rights, 68–69
 - violations, 75
 - workplace, 75–76
- ILO Forced Labour Convention, 97
- Impression management, 17–18
- Increasing commercial concerns loop, 59–60
- Independent expert consultation, 87
- Indicator measure, 136
- Inductive strategy, 78
- Industrialisation, 107–108
 - strategies, 112
 - technology in advancing, 112
- Industry-specific risks, 84
- Informit, 76–77
- Innovative management accounting techniques, 124–125
- Institutional isomorphism, 75
- Institutional theory, 72–76
 - coercive isomorphism of, 75–76
- Integrated Performance Measurement, 108
- Intensity of Competition and Structure of Ownership and Control, 113–114
- Intensity of Market Competition, 113–114
- Intergovernmental Panel on Climate Change (IPCC), 161
- Internal consistency, 114–115
- Internalities, 110
- International Labour Organization (ILO), 68–69, 75–76
- International Modern Slavery Act, 76
- International organisations and influence on CER, 171
- Interpretive approach, 18
- Interpretivism, 14
- Isomorphism, 75–76
- Iterative framework, 15–16
- Iterative strategy, 78
- Kaiser-Meyer-Olkin measure of sampling (KMO measure of sampling), 114–115
- Key performance indicators measurement, 88
- Land destruction, 61
- Legislation, 71–72
- Legitimacy theory, 138–140
 - voluntary sustainability disclosure and, 139–140
- Leverages, 60
- Life Cycle Costing, Customer Accounting, 108
- Management accounting practices, 110
- Mann-Whitney test, 116
- Manufacturing companies
 - economic performance of, 112
 - implementing SATs, 108
 - in Nigeria, 107–108
 - performance of, 107–108
 - SAP implementation in, 121, 125–126
- Market orientation, 108, 113–114, 123–124
- Market Share, 114
- Maximum likelihood estimation method, 114–116
- Media, 69
- Mental models, 46–47
- Mexico, Indonesia, Nigeria, Turkey (MINT countries), 12–13

- environmental SDG implementation progress in, 32, 34, 38
- outcome of environmental SDG implementation in, 26–27, 31–32
- Middle East and North Africa (MENA), 173
- Modern Slavery Act, 69–72, 76–77
- Modern Slavery Bill, 71–72
- Modern slavery practices, 75
- Modern slavery risk disclosures, 68
 - assess and address risks, 86–87
 - categorisation, 79–80
 - data set, 76–77
 - determinants of modern slavery, 78
 - disclosure index with nine principles and 49 sub-principles, 96
 - efficacy of actions, 87–89
 - external communication, 91–92
 - prior human rights disclosure research, 73–74
 - institutional theory, 72–76
 - legislation, 71–72
 - modern slavery risk monitoring and detection policy, 86
 - modern slavery risk prevention action (vigilance) plan, due diligence and policy, 85–86
 - nature and extent of problem with modern slavery practices, 70–71
 - non-compliance and enforcement, 95
 - oversight, 89–91
 - recognising modern slavery practices, 81–83
 - regulation and frameworks for, 69–70
 - prior research, 72
 - research method, 76–78
 - risk identification, 83–85
 - suppliers' assessment and code of conduct for ensuring transparency, 92–95
- Multi-dimensional approach, 3
- Multi-stakeholder network, 48
- Multi-stakeholder participation literature for Agenda 2030, 48–51
 - New Zealand Transport Infrastructure Project, 50–51
- Multi-stakeholder partnerships, 12–13
- Multi-stakeholders mechanism, 4–5
- Multiple stakeholder conflicts, 47
- Multistakeholder participatory approach, 2
- Multistakeholder processes (MSPs), 49
- Negative feedback loops, 59
- New Zealand Transport Agency (NZTA), 46–47, 51
- New Zealand Transport Infrastructure Project, 50–51
- Nigeria
 - contextual background about Nigeria and SDGs, 142–143
 - environmental reporting in, 109–110
 - industrialisation in, 112
 - SDGs achievement by, 137
 - sustainability practice in, 107
 - water important in, 136
- Nigerian manufacturing sector, 107–108
- Nigerian Stock Exchange (NSE), 113, 137
- Non-compliance and enforcement, 95
 - consequences, 95
- Non-financial disclosure in social accounting, 75
- Non-government organisations, 69
- Non-response bias, 115
- NSW Act, 82, 84, 89, 91–93
- Office of Senior Special Adviser to President on SDGs (OSSAP-SDGs), 142–143
- One-fit-all approach, 110

- Organisation for Economic Co-operation and Development (OECD), 68–69
 Organisation risks, 85
 Organisational façade, 142
 Organisational size, 113–114
 Organised hypocrisy, 142
 Oversight, 89–91
 - approval and signatories, 90
 - board of directors and senior management commitment, 90–91
 - specific committee formation to oversee modern slavery risk reporting, 90
- Partnership in SDG, 12–13
 Perceived Environmental Uncertainty (PEU), 113–114
 Polluting roads loop, 58–59
 Populating roads loop, 58
 Positive feedback loops, 58
 Poverty, 68
 Premium board companies, 137, 143 and reports, 144
 - SDG-6 achievement by, 143–144
 - voluntarily disclose contributions on SDG-6, 147
- Price-fixation, 108–109
 Pricing strategy, 108–109
 Principal component analysis, 115
 Prioritisation of risks, 87
 Private organisations, 68–69
 Private Sector Advisory Group (PSAG), 143
 Problem structuring methods, 52–60
 - BOT graphs, 53
 - causal loop model, 57
 - clusters, 56
 - feedback loop analysis, 57–60
 - group model building, 55
 - hexagons, 55–56
 - stakeholder analysis, 53–55
 - variables, 56–57
- Product and service risks, 84
 Product responsibility, 108–109
 Profitability, 114
 ProQuest, 76–77
 ProShares, 144
 Public organisations, 68–69
 Public sector, environmental
 - accountability in, 170–171
- ‘Pull factors’. *See* Internalities
 ‘Push factors’. *See* Externalities
- Qualitative disclosures, 146
 Qualitative method, 18
 Qualitative research design, 137–138, 143–144
 Quality CER research in SSA, 164
 - approach taken to search and review literature, 164–165
- Quality Costing, 108
 Quality of disclosures examining to SDG-6 achievement, 148–151
 Quality of Information Technology (QIT), 113–114
 Quality of sustainability disclosures, 142
 Quantitative disclosures, 146
 Quantitative method, 18
