INDEX

A Nation at Risk, 118
Academic experience, 67
Academic gap, 19–20
Active recruitment, 14–16
Administrative leadership, 215–216
Advanced Placement classes (AP classes), 148
Age of STEM, 110
Agency, 162–163
as student and human being, 170–171
Alternative Certification Pathway for STEM (ACP for STEM), 219–220
American Educational Research Association (AERA), 38, 89–90
American STEM workforce, 180
Analysis of variance (ANOVA), 89
Analysis tools, 143–144
Attributes, 19
Bachelor of arts (BA), 14–16
Bachelor of science (BS), 14–16
Biological Sciences Curriculum Study, 43
Biology (BIO), 16–17
Broadening, 118, 143, 164, 187
Brookhaven National Laboratory, 73
Building relationships, 78
Burrowing, 143–144, 164, 187
California Polytechnic State University (Cal Poly), 72
Capacitor Aided System for Teaching and Learning Electricity curriculum (CASTLE curriculum), 58–59
Career developments, 228–229
Center for Academic Support and Assessment (CASA), 12–14
Central data-yielding approach, 92
Certified physics teacher production, 36–37
Chemistry (CHEM), 16–17
Chiyoda Young Innovators’ Academy, 33, 74
Civic responsibility, 184
Classroom
improving classroom management, 101–102
teacher leader, 216–217
Classroom Interactions (CI), 16–19
Coleman Report, 113, 137
College and Career Readiness Standards (CCRS), 34–35
College of Education (COE), 12, 14, 16, 27–28
College of Natural Science and Mathematics (NSM), 12, 14, 27–28, 50, 202
Computer science education, 110–111
Conference/meeting attendance, 71–72
Confidence, 98
changed attitude and behavior toward teaching in STEM, 102–104
improved classroom management, 101–102
increased preservice teachers, 98–104
strengthened teacher motivation and commitment, 99–101
Contemporary American Research, 113
Counterstories, 152–153
“Cross-eye scripting”, 168
Cultural competence, 78
Culturally responsive pedagogy (CRP), 19–21, 75–76, 78, 219
characteristics of, 21
incorporation of CRP into teachHOUSTON field-based courses, 22
Curriculum. See also School curriculum, 28, 44, 48–49
learner, 141–142
making, 111, 141–142
milieu, 142
“small stories” of curriculum making, 144–145
subject matter, 142
teacher, 141
Curriculum and Instruction (CUIN), 218–219
Darling Hammond’s metaanalysis of policy documents, 19–20
Demonstration lessons, 18
Department of Physics, 29
Dialectics, 164
Discipline specific teacher education courses, 70–71
Earth Science Curriculum Project, 43
Economic efficiency, 184
Education in Multicultural Society (EMS), 221
Education(al), 41–42
purpose of education, 184
system, 47–48
EducationNEXT, 137–138
Effective instructional strategies, 18–19
English as a Second Language/ English Language Learners (ESL/ELL), 217
English as Second Language (ESL), 148
Ethnographic approach, 91
Experience, 139–140, 161–162, 185
Experiential learning, 67
Exxon Mobil Bernard Harris Summer Science Camp, 33, 74
Faculty members, 14–16
Familial curriculum making, 126
Females in STEM disciplines, 167–168
Fictionalization, 143–144
Field-based courses, 17
Field-based experiences, 67
Financial incentives
scholarships, 182
for STEM students, 181
First time in college students (FTIC students), 207–208
Fluid inquiry, 127–128
Formal activities, learning through, 66–67
Formal learning experiences. See also Informal learning experiences (ILEs), 86
preservice teacher preparation enhancement through, 66
Grade point averages (GPA), 19–20
Graduate students, 119–120, 145
Grant opportunities, 218–223
Higher education, 159–160
Human being, agency as, 170–171
Human preparation, 194–195
Human relationship, 184
Identity, 116–117, 140–141, 162, 186
Improbability of certainty, 128
In loco parentis, 152
In-service science teacher preparation programs, 12, 41–43
Informal activities, learning through, 66–67
Informal learning experiences (ILEs), 14, 16, 86–89
mathematics education, 90–91
in preservice teacher preparation, 89–90
preservice teacher preparation enhancement through, 66
science education, 90
in STEM, 89
Innovation
grant opportunities, 218–223
leading through, 218–223
Inquiry. See also Narrative inquiry, 12
