

INDEX

- Aaker's and Joachimstahler's model
 - of consumer brand equity, 50–52
- Adaptive Neuro-Fuzzy Inference System (ANFIS), 16, 21
 - visual prediction performance, 22–24
- Adjustment-anchoring, 81
- Advertising, 56
- Affinity propagation clustering, 16
- Ahi Unions, 67
- Akaike information criterion, 167
- Allais paradox, 80
- Alternative input–output orders for prediction, 19–20
- “Anchoring effect”, 88, 90
- Anderson and Darling test, 267
- ARCH LM test, 39
- Artificial intelligence, 14
 - applications and evaluation, 20–23
 - artificial intelligence-oriented approach for stock price prediction, 15
 - economic data prediction, 17–20
 - future research ideas, 23–25
 - literature view, 15–17
- Artificial Neural Networks (ANNs), 18
- Asian financial crisis, 32–33
- Association of British Insurers (ABI), 101, 245
- Athens Stock Exchange, herd behavior in, 180
- Augmented Dickey–Fuller test (ADF test), 38
 - unit root test results, 167
- Augmented reality (AR), 54
 - application, 57–58, 62
 - comparison of respondents' attitudes toward
 - demographics, 59
 - experiential field research on, 60–64
 - frequencies of online information gathering and internet applications, 60
 - literature review, 55–58
 - online shopping frequencies of respondents, 60
 - place and potential, 54
 - purchasing behaviors of respondents, 59–60
 - purpose and method of study, 58–59
 - respondents' attitudes toward brand trust and purchase intentions, 60–62
 - technology, 54–55
- Augmented reality applications (AR applications), 157, 157
 - comments, 160–161
 - comparison of respondents' attitudes toward experiential marketing, 159
 - findings and comments, 159–160
 - importance, purpose, and method of research, 157–158
 - method of research and hypotheses, 158
- Auto-enrolment
 - employer pension system, 105
 - pension systems, 103
 - plan, 110
 - system, 106–108
 - workplace schemes, 106
- Autoregressive Integrated Moving Average model (ARIMA model), 16
- Autoregressive Model (ARM), 18
- Aydin Fig Producers Company, 68

- Barlet test, 194–195
- Bartlett kernel, 273
- Bayes' theorem, 79
- Bayesian Learning on Gaussian process model (BG), 18
- Bayesian learning theory, 79
- Behavior(al)
- biases (*see also* Cognitive biases), 84, 86, 112, 246
 - control, 7–8
 - dimension of economics, 216
 - economics, 205–206
 - in financial services, 103–104
 - influences, 100–102
 - intentions, 49
 - obstacles to proper planning, 105–116
- Behavioral economy analysis, 205
- data and methodology, 208–209
 - empirical results, 209–212
 - literature review, 206–208
- Behavioral finance, 78, 80, 103, 105, 116, 216–217, 219, 247
- acknowledges emotional, 101
 - anchoring, 83
 - avoidance of ambiguity, 82–83
 - cognitive contradiction, 83
 - conservatism, 81
 - framing, 82
 - herding, 83–84
 - literature, 81
 - loss aversion, 84
 - mental accounting, 82
 - optimism, 83
 - overconfidence, 82
 - regret avoidance, 84
 - representativeness, 82
 - status quo biases, 83
 - theories and research, 104
- Behavioral obstacles, 105
- amounts available for saving of average Maltese households, 108
 - behavioral finance, 116
 - choice-overload, 114
 - comparison tables, 120–138
 - employees participating in workplace pensions, 106
 - indicators used to calculate MMGPI, 107
 - people's behavior, 112
 - portfolio options, 113–114
 - PRIIPs, 113
 - Save for Tomorrow™, 109–110
 - SRA, 111
- BIST Whole Index, herd behavior on, 181–183
- Brand trust
- within context of experiential marketing, 55–57
 - respondents' attitudes toward, 60–62
- Brand(ing), 46–47
- ability, 56
 - associations, 51–52
 - awareness, 51–52
 - brand-as a person, 50
 - brand-as product, 50
 - brand-as-organization, 50
 - brand-as-symbol, 50
 - equity measurement and application of models, 46, 51
 - identity, 48, 50
 - image and reputation in, 48–49
 - information, 56
 - loyalty, 51
 - relational network brand, 47
 - reputation, 56
 - systematic analysis, 51
- Bretton Woods fixed exchange rate system, 164
- Cash and cashless payments in Poland
- literature review, 140–143
 - no possibility of cashless payment, 145–150
 - number and value of payments in Euro area, 142
 - research method and results of primary research, 143–145

- Cashless Payment Support Program, 146
- Central Bank of Republic of Turkey, 165–166
- Chartered Institute of Personnel and Development (CIPD), 110
- Chinese stock index, 16
- Chinese stock markets, herd behavior in, 179
- Co-integration regression (*see also* Panel Johansen co-integration test), 269–274
- Cognitive biases, 80–81
 - anchoring, 83
 - avoidance of ambiguity, 82–83
 - cognitive contradiction, 83
 - conservatism, 81
 - framing, 82
 - herding, 83–84
 - loss aversion, 84
 - mental accounting, 82
 - optimism, 83
 - overconfidence, 82
 - regret avoidance, 84
 - representativeness, 82
 - status quo biases, 83
- Compensation-based herd behavior, 222
- Consumer control, 6
 - as coping strategies against risks, 8–9
- Consumer Financial Protection Bureau, 116
- Consumers, 140–141, 146–147
 - Aaker's and Joachimstahler's model of consumer brand equity, 50–52
 - cash and cashless payments constitute, 140
 - risk in consumer behavior, 2–4
 - trust, 6
- Contactless cards, 141
- “Control of Corruption” indicator, 262
 - and SM performance, 266, 274
- Cooperative(s), 66
 - historical dynamics of cooperatives in Turkey, 67–68
 - model, 67
 - movement, 68
 - “tedavün”, 67
- Cooperatives Act, 68
- Crypto-currencies, 25
- Customer
 - experiences, 56
 - participation in production, 8
- DCC-GARCH method, 33
- Department for Work & Pensions (DWP), 105–106, 110, 116
