

## SUBJECT INDEX

Page numbers followed by *f* and *t* indicate figures and tables, respectively.

- ABA. *See* Abscisic acid (ABA)
- Abiotic stresses, 68
- Abscisic acid (ABA), 11
- ABSP II. *See* Agricultural Biotechnology Support Project II (ABSP II)
- Acreage planted  
GM corn, proportions of, 157
- Ad hoc productivity, 290
- Aflatoxins, 13
- AFLPs. *See* Amplified fragment length polymorphisms (AFLPs)
- Africa  
sweet potato in, 14
- AgrEvo, 133
- Agricultural biotechnology, 226, 228, 229, 240  
adoption of, 231  
economics of, 226
- Agricultural biotechnology patents, issue rate of, 116, 117*f*
- Agricultural Biotechnology Support Project II (ABSP II), 107
- Agricultural chemical companies, 132
- Agricultural commodities, 310
- Agricultural crops. *See also* Plants  
cisgenic, 9  
development in, DNA-based techniques and, 2–3, 3*f*  
genetically modified. *See* Genetically modified (GM) crops  
genetics and, 2–4  
herbicide-tolerant crops, 36–38  
losses in, due to pests, 33, 33*f*  
transgenic, 7–8
- Agricultural productivity  
biotechnology, impacts of, 229–231  
GHG emissions, 237  
increasing, 179
- Agricultural research, public expenditures on, 141, 143*t*
- Agrobacterium tumefaciens*, 64  
gene transfer with, 123
- Agro-biological dynamics, 203
- Agro-climatic conditions, 159
- Agro-ecological dynamics, 203
- Agroeste Sementis, 135
- Allele, 4
- Aly Paticipacoes, 135
- Amaranthus palmeri*, 181
- Amplified fragment length polymorphisms (AFLPs), 4
- Animal and Plant Inspection Service (APHIS), 123–125, 124*f*, 125*f*
- Animals  
biopharm, 9–10  
transgenic, 9–10
- Antithrombin, 10
- APHIS. *See* Animal and Plant Inspection Service (APHIS)
- APHIS reviews risk factors, 356
- Argentina  
HT soybean adoption, 37, 67  
transgenic crops in, 8
- Asgrow Seed Company, 135
- Asia  
GM crops in, 57–63
- ASSOCHAM, 100
- Astra Zeneca, 137
- ATryn, 10
- Avery, Oswald, 119*t*, 120
- Bacillus thuringiensis* (*Bt*)  
crop varieties, advantages for, 122  
genes, 116, 122
- Bacillus thuringiensis* (BT) corn, 359  
category, 360  
risks, 360
- Bacillus thuringiensis* (*Bt*) gene, 8  
cotton, in Asia, 58–63  
crops, 38–40, 39*t*  
*CryIAc/CryIAb*, 91  
eggplant in India, 42–43, 105–108, 106*t*  
household income effects of, 41*f*  
white maize, 64  
yellow maize, 64

- Bangladesh  
 adoption of GM rice, 298  
 GM food crops, 290  
 importer of wheat, 301  
 regulatory experts, 291
- Bargaining capabilities, 217
- Bayer CropScience, 133–134  
 with Chinese Academic of Agricultural Sciences, 143  
 on R&D, 140
- Beatle, George, 119*t*, 120
- Beta carotene, 13
- Bikaneri Narma*, 91
- Bill & Melinda Gates Foundation, 12, 13
- Binary variable for double-stacking ( $K_{ij}$ ), 156  
 coefficients of, 164
- Biocentury Transgene Technology Company (BTCC), 91
- Biocide Index, 66
- Biofuels, 15–16, 225, 226, 227  
 carbon benefits of, 226  
 demand for, 235  
 corn, 232  
 economics of, 226–229  
 food market, 233  
 future of, 239–240  
 GHG neutral technology, 228  
 industry, 228  
 market with mandate and capacity constraint, 236  
 production, 236, 240  
 risk of bankruptcies, 236  
 subsidies, 236–237  
 sustainability of, 228
- Biopharm animals, 9–10
- Bioremediation, 16
- Biosafety Bill for GM crops, 127
- Biosafety Clearing House (BCH), 322
- Biosafety policy, 327
- Biosafety policymaking, 327
- Biosafety regulations, domestic of GM food, 284
- Biotech crops  
 in 2009, by major producing country, 126*t*
- Biotech event, 133
- Biotechnology  
 APHIS in, 123  
 future of, 239–240  
 impacts of  
 on agricultural productivity, 229–231  
 use of, 246
- Biotechnology, agricultural, 1–19  
 adoption of, 88–92  
 diversity analysis, 4, 5–6  
 genetics, 2–4  
 investments in, 85–92  
 molecular marker, 4–5, 6–7
