

INDEX

Note: Page numbers followed by “*n*” with numbers indicate notes.

- Absorptive capacity, 421–429
- Acquirer nation GDPpc, 446
- Adaptation–performance relationship, 464–465
- Administrative distance, 440–441, 444, 447
- Affordable losses principle, 342–343
- African multinationals (AfMNEs), 436, 438, 440, 443, 447, 450–451, 453–454
- Age, 208
 - diversity, 212, 217
- Agency Theory, 160
- Ambidexterity, 405–410
 - research methods, 408–409
 - research results and discussion, 409–413
- Ambidextrous companies, 409–413
- Ambiguity, 6–7, 27, 32
- Analysis of variance (ANOVA), 317
- Applied import tariff, regression
 - model of, 126–129
- Argentina, institutional schisms in, 96–98
- Armington elasticity, 70–72
- Automation, 263
- Automobile trade between Germany and United States, 108–110
- Automobile-producing countries, 125
- Average variance extracted (AVE), 343–344
- Avoidance strategy, 136, 143, 148–149
- Ayur project, 276
- Back-sourcing, 243
- Backshoring (*see also* Offshoring), 229–230, 235, 252
 - contribution to theory, 264–265
 - data analysis, 257–258
 - data collection, 257
 - findings, 258–262
 - in-depth studies, 252
 - institutional perspective on, 262–264
 - limitations and future research, 265
 - motives for, 252–254
 - research design, 257
 - RSD alternative, 232
 - ship equipment supplier, 261–262
 - shipbuilding company, 260–261
 - theoretical background, 253–256
- Backward linkages, 73
- Bandwagon effect, 237
- Base of pyramid (BoP), 13, 270–271, 282
 - markets, 271–272
 - multinationals’ strategies in addressing, 273–274
 - research design, 275
- “Beggart-hy-neighbour” policy, 106
- Binary logistic regression (BLR), 446
- Biomedical company, 242–243
- Blau’s index, 212
- Board independence, 213, 214
- Born globals (BGs), 290–291, 361
 - comparative analysis, 297–303
 - continued performance, 302–303
 - data analysis, 297
 - data collection, 297
 - firms, 13, 229
 - knowledge development in foreign-market networks, 300–302
 - liability of foreignness in, 297–300
 - research design, 295–297
 - selection of firms, 295–296
- Born regionals (BRs), 290
 - modeling BR performance strategy
 - from network perspective, 294–295

- Born-glocal path, 358–359, 361, 366, 372–373, 375
- “Bottom of pyramid” (see Base of pyramid (BoP))
- Brazilian firms, 15, 426
- Breusch–Pagan test, 120
- Bricolage, 359–360, 366–367
- British Venture Capital Association (BVCA), 309*n*4
- “Broad and shallow” strategy, 294
- BUILD-B, 271, 277–278
- Bureaucratic authoritarianism, 425
- Capital IQ, 162
- “Capitalist” business/management education, 427
- Captive offshoring, 231, 233
- Carrot-and-stick approach, 152
- Cash reserves, 144, 146
- CAWI method, 133
- CEE-based furniture producers, 472
- Challenge* strategy, 135, 143–149
- Chief executive officer (CEO), 213, 297
- China cycle, 487–489
- China’s changing value chain position, 79–83
- Chinese OFDI, 502
- Circularity, 33
- Clothing companies, 237–238
- Coercive drivers, 255, 259
- Coercive isomorphism, 462
- Cognitive behavior, 437
- Collectivism, 256
- “Collectivistic” cultural values, 425
- Commodity cycle phase, 485–487
- Common method variance (CMV), 470
- Common methods bias (CMB), 318, 322, 343
- Companies’ adjustment strategies to sanctions, 132–133, 135
 - administrative burdens, 145–146
 - companies’ behavior in sanctions regime, 133–135
 - conceptual framework, 135–137
 - dependent variables, 143–144
 - disentangling challenge strategies, 148
 - disentangling conformance strategies, 147
 - empirical analysis, 141
 - EU sanctions against Russia and Russian countersanctions, 133
 - independent variables, 144
 - institutional theory, 138–139
 - limitations, 149–150
 - politics of challenging sanctions, 150–152
 - regression models, 145
 - sample characteristics, 141–143
- Companies’ behavior in sanctions regime, 133–135
- Company strategic choices, 200
- Complexity, 4, 6–7, 23, 27, 32, 57
- Composite reliability (CR), 318, 343
- Confirmative factor analysis (CFA), 318
- Conformance* strategy, 135, 143–148
- Constant elasticity of substitution structure (CES structure), 71
- Construct reliability and validity, 318–320
- Consumer-theory-centered models, 73
- Context-specific talent management practices, 15, 420–429
 - investigating connection between talent management and absorptive capacity, 421–424
 - talent management and absorptive capacity, 424–429
- Contract manufacturing, 81
- Contractionary trade policies, 69–70
- Contradictory moderation effects, 328
- Control
 - control-based strategy, 339
 - decisions of MNEs, 27
 - strategy, 342–343
 - variables, 186, 445–446, 467, 469
- Control of Corruption (CC), 495
- Convergence, 420, 344
- Corporate entrepreneurship (CE), 310–311

- Corporate sanctions' adjustment strategies, 135–137
- Corporate social responsibility (CSR), 270, 281
- Corporate venturing, 311
- Correlations matrix, 448
- Costs (*see also* Transaction costs), 25
 - efficiency, 254
 - hidden, 252
 - institutional, 298
 - skilled-labor, 75
- Country institutional environments, 92–95
- Cross-border acquisitions (CBAs), 15, 437
 - administrative distance, 440–441
 - AfMNEs, 450–451
 - control variables, 445–446
 - correlations matrix, 448
 - data and sample, 443–444
 - gaining legitimacy in foreign countries, 439–440
 - hypotheses, 440
 - institutional differences across countries, 438–439
 - knowledge distance, 441–442
 - limitations and future research avenues, 453–454
 - literature review, 437
 - logistic regression results, 449
 - MNEs, 437–438
 - ownership in, 436–438
 - procedures of analyses, 446–447
 - results, 447, 450
 - target institutional development, 442–443
 - technological weaknesses, 451–452
 - variables, 444–445
- Crowdfunding, 360
- Cultural
 - distance, 497
 - proximity, 501
- Customer perceived value, 253–254
- Data and sampling, 470
- De-internationalization, 231–232
- Debt Dependent, 168
- Debt-to-equity ratio, 212
- Decision magnitude, 235
- Decision-makers, 25–26, 48
- Decision-making, 25–26, 56, 208, 229, 233–234, 336–337
- Defiance strategy, 136, 143, 148, 151–152
- Degree
 - of diversification, 445
 - of internationalization, 202
- Demand theory, 71
- Demographic diversity, 208
- Dependent variables, 143–144, 163, 180, 444, 495
- Determinants of multinationality, 489–490
 - firm-specific advantages and multinationality, 492–494
 - MNCs from emerging economies, 494–492
- Development reshoring, 232–233
- Digital disruption, 388
- Digital products, 389–390
- Digitally based firms, 389–390
- Digitization, 62
- Discriminant validity, 318, 321, 344
- Distance-collapsing capacity, 365
- Dominant logic, conflict of, 312
- DRUG-C, 271, 276–277, 282–283
- Duara travels, 363
- Dublin-Watson test, 348
- Durban-Watson test, 120
- Dynamic capabilities, 175, 384, 391, 393, 398
- Dynamic resources, 139, 159n1
- Ecological dimension, 185
- Economic dimension, 183
- Economic freedom, 12, 158–170
- Economic sanctions, 133, 150
- Economic theories, 41–42, 132
- Economic value creation, 359
- Ecosystem economy, platform and, 46–47
- Effectuation, 334–335
