

# INDEX

- Abusive supervision, 218
- Activation, 144–146, 149, 151
- affect and task-attentional pull, 149–151
  - current study, 151–152
  - implications for theory and practice, 158–161
  - limitations and future research, 161–163
  - multiple-goal pursuit, 146
  - participants, 152–153
  - previous research on affect and multiple goals, 147–148
  - procedure and materials, 153–154
  - resource allocation among multiple goals, 146–147
  - results, 154–157
- Additive model, 174
- Affect, 145, 170, 173–174
- affect-related concepts, 2–3
  - asymmetry, 174–175
  - conceptual framework, 172–174
  - measures, 181–182
  - previous research on, 147–148
  - results, 183–185
  - sample and procedure, 181
  - and task-attentional pull, 149–151
  - team process norms, affect infusion, and decision-effectiveness, 178–181
  - theory, 175–178
- Affect infusion model (AIM), 6–7, 170, 176, 178
- Affective commitment, 219
- Affective Events Theory (AET), 6, 130, 285
- Affective organizational commitment (AOC), 7–8, 218–220, 223
- Affective value, 144–145
- Affectivity, 96–97
- Aggressive put-downs, 218
- Amazon Mechanical Turk (MTurk), 152–153, 222
- Ambivalence, 41
- Analytic approach, 246–247
- Anger, 100, 265–266
- in leadership, 268
- Antecedent-focused strategies, 251–252
- Appraisal theory, 6
- Asymmetrical outcomes, 263–264
- Asymmetry, 171
- Attitudinal ambivalence, 42–43
- Authentic self, 64–65
- Availability, 79
- Average variance extracted (AVE), 203
- Avoidance motivation, 101
- Banks, 201
- Behavioral dimension of ambivalence, 43
- Benefits, 292–293
- Bifurcation in emotional studies, 40–41
- Buffer-type resources, 19
- Bullying, 218
- California-based nonprofit organization, 16–17
- Caring, 99
- Change. *See also* Organizational change, 2, 40, 48
- Charismatic communication, 293
- Climate of authenticity, 18–20
- Close colleagues, 75
- relationships, 80–84
- Co-workers, 74
- relationships, 18
- Coding, 47

- approach, 246–247
- Cognitive dimension of ambivalence, 43
- Cognitive reappraisal (CR), 132
- Cognitive resource theory, 6–7, 175
- Colleague relationships, 74–75
- Common method variance (CMV), 155, 231
- Comparative fit index (CFI), 104
- Compassion, 99
- Composite reliability (CR), 203
- Compromise, 52
- Confirmatory factor analysis (CFA), 155
- Conflicting emotions, 40–41
- Connectedness, 99
- Conscientiousness, 292
- Conscious selves, 62
- Continuance commitment, 219
- Control variable analysis, 204
- Coping strategies for emotional ambivalence, 51–52
- Coronavirus (COVID-19), 240, 246–247, 284
  - disruption, 3
  - pandemic, 2, 6, 16, 144
- Cronbach's Alpha, 203
- Cumulative interruptions, 124
  
- Data, 245–246
  - analysis approach, 47–48
- Day reconstruction method, 246
- Decision-effectiveness, 178–181
- Decision-making teams, 170
- Deep acting, 94, 98
- Descriptive statistics, 203, 225
  - and correlations among study variables, 225
- Diary studies, 22
- Discrete emotions, 5–6, 124
- Discrete Emotions Emotional Labor Scale (DEELS), 23–24
- Discriminant validity, 203
- Disengagement, 51
- Disengagement-engagement, 44
- Dispersive approach, 171, 174
  
- Dispositional affect, 100–101
- Dispositional affective traits, 103
- Disruptions, 2–3, 63, 122
  - emotions and performance-related outcomes during, 5–7
  - learnings and solutions about emotions during, 9
  - supervisors and leaders in disruption, 7–8
- Distractions, 127
- Disturbance, 126–128
- Dreaded emotions. *See also* Emotions
  - anger in leadership, 268
  - emotions and leadership, 262–263
  - fear, perceived loss of control, and risk-averse behavior, 265–266
  - fear in leadership, 265
  - fear vs. anger in risk perception, 269–271
  - sadness in leadership, 272–273
  - target of leader anger expression, 269
  - target of leader fear expression, 266–268
  - target of leader sadness expression, 273–274
  - utility and functionality of emotions, 263–265
- Dualistic approach, 40–41
- Dynamic mixed-methods approach, 16–17
  
- Effective customer-driven service delivery, 196
- Effective decision-making, 264
- Effortful emotional labor, 30–31
- Emergency rooms (ER), 101–102
- Emotion(al) regulation, 6, 18, 129, 133–134, 241–243, 256
  - process model of, 243
  - strategies, 95
  - at work, 131–132
- Emotional ambivalence, 41, 48
  - during organizational change, 45
  - in organizations, 43–45

- Emotional complexity, 41
- Emotional dimension of ambivalence, 43
- Emotional display rules, 94, 97, 102
- Emotional expectations, 24–27
- Emotional experiences, 27–29
- Emotional intelligence (EI), 7, 196, 198–200, 218, 221–222, 224, 289
- Emotional labor (EL), 16, 94–96
  - climate, motivation, and work–life boundaries, 32–34
  - diary and semistructured interview data, 23–24
  - methodology, 22–24
  - organization-wide panel data, 23
  - origins, 17–18
  - research design and data, 22–24
  - results, 24–29
  - socializing emotional labor in organizations, 17–22
  - strategies, 102–103
- Emotional management, 99
- Emotional performance, 103

- Emotions, 2–3, 39–40, 94, 100, 131, 196, 264
  - coaching in, 255
  - critical role of leader emotional competencies and responses during disruption, 292–294
  - disruption, 287–290
  - in disruptive contexts, 4–5
  - importance of working relationships for, 290–292
  - and leadership, 262–263
  - learnings and solutions about emotions during disruption, 9
  - during organizational change, 241–243
  - performance, 18
  - and performance-related outcomes during disruption, 5–7
  - salience and complexity of, 285–287
- Employees' positive emotions, 4
- Engagement, 63, 76, 80
- Escape mechanism, 53–54
- Exploratory factor analysis (EFA), 105–106
- Expressive suppression (ES), 132
- External interruptions, 126
- Eye-witness memory, 269
- Fear, 264–266
  - in leadership, 265
- Full-time employees (FT employees), 4, 16–17, 21–22, 285
- Gaslighter, 7–8
- Gaslighting, 7–8, 218–219
  - AOC, 219–220, 223
  - descriptive statistics, 225
  - EI, 221–222, 224
  - gaslighting scenarios, 222–223
  - implications for research and practice, 230–231
  - limitations and directions for future research, 231–232
  - LMX quality, 220–221
  - manipulation check, 224–225
  - materials, 222–223
  - measures, 223–224
  - mediation tests, 225–226
  - method, 222–225
  - moderated mediation tests, 226
  - participants, 222
  - perceptions of LMX, 223–224
  - procedure, 224
  - results, 225–226
  - statistical analysis, 224–225
  - in workplace, 219
- Gender inequality, 16
- Gendered emotional labor, 20
- Generating positive emotion, 249
- Geneva Emotional Competence Test, 232
- Genuine emotional expression, 31–32
- Global Financial Crisis, 62–63
- Goals, 146
  - goal-based affective value, 144–145

- Great renegotiation, 2  
 Great resignation, 2  
 Gross' model, 243
- Happiness, 269–270  
 Hierarchical Linear Modeling (HLM), 155  
 Holding environments, 66–68  
 Hospital environment, 95
- Individualized socialization, 21  
 Inflexibility-flexibility, 44  
 Institutional theory, 3  
 Institutionalized socialization, 21  
 Intensive care units (ICUs), 101–102  
 Internal interruptions, 126  
 Interpersonal cooperation, 267  
 Interpersonal interactions, 269  
 Interruptions, 122, 124
  - emotion regulation, 129–134
  - work-enhancing interruptions,
    - emotion regulation, and individual outcomes, 132–133
  - work-hindering interruptions,
    - emotion regulation, and individual outcomes, 133–134
