ACKNOWLEDGMENTS

The publication of this volume would have not possible without a collective effort of researchers who have participated in a series of seminars, colloquia, and conferences on the themes covered in this book.

Two important research groups have been instrumental in stirring scholarly research and bringing to life this collection. Most contributions emanate from a series of research sessions held in the Special Interest Group “Business for Society” at EURAM (European Academy of Management) from 2014 to 2016. The second largest group of contributors has been involved in the SIMPACT project, the acronym for “Boosting the Impact of SI in Europe through Economic Underpinnings,” a three-year research project by a consortium of twelve European research institutions and universities funded under the European Commission’s 7th Framework Programme. A third group of contributors conduct scholarly research as practitioners in the European banking and financial institutions. We wish to express our thanks to all for their scholarly work and intellectual commitment. Their names appear on the preceding page in this volume.

In addition to the above group of researchers, our special thanks go to our colleagues at NEOMA Business School, Mr. Mark Holdsworth for his engagement and hard work throughout our internal copyediting process, Dr. Frederic Nlemvo, Chair, Department of Strategy and Entrepreneurship and Dr. Maryline Thenot, Chair, Department of Finance for their suggestions and academic support. Similarly, we wish to thank our colleagues at the International Research Center on Sustainability and HABITER Research Center at Reims Champagne-Ardenne University, Dr. François Mancebo, Dr. Stéphane Rosière, and Dr. François Bost for their interest and support.

Our warmest gratitude is addressed to Dr. William Sun, “Critical Studies on Corporate Social Responsibility, Governance and Sustainability” Series Editor, whose suggestions and support were particularly appreciated throughout the editing process.

The volume chapters provided by EURAM research group were double-blind reviewed, while all other chapters were simultaneously single-blind and editor reviewed.
