Contents

10th Nordic Conference on Construction Economics and Organization (CEO 2019)

vi Editorial

THE ECONOMICS AND BUSINESS OF CONSTRUCTION

3 Updating and Cleaning Out: The “Make or Buy” Decision in Construction Revisited
   Johan Nyström

9 Bispevika Project: Research for Constructing a Collaborative Value Chain
   Ole Jonny Klakegg, Lars Kristian Hunn and Per Fridtjof Larssen

17 Social Considerations in the Procurement of Road and Railroad Projects in Sweden
   Agnes Lindell and Stefan Olander

25 Standardization and Industrialized Construction of Special Purpose Building
   Teresa Magdalena Beste, Ole Jonny Klakegg and Jørgen Kjetil Knudsen

33 Identifying Contradictions of Integrating Life-Cycle Costing in Design Practices
   Maria Saridaki and Kim Haugbølle

41 Advancing Networking-Based Business Management in Construction Markets
   Pekka Huovinen

49 Contracts and Culture in a Partnering Project
   Per Fridtjof Larssen, Atle Engebø, Ola Lædre and Ole Jonny Klakegg

59 Sub-Contractors’ Perception of Contracting: The Case of Crime
   Sondre Evjen, Gustav Gunnerud, Ola Lædre, Rune Søfting and Jardar Lohne

69 Project Managers: Gatekeepers or Inside Men?
   Gustav Gunnerud, Sondre Evjen, Rune Søfting, Ola Lædre, Nina Kjesbu and Jardar Lohne

77 The Hybridity of Strategic Partnerships and Construction Supply Chain Management
   Nicolaj Frederiksen, Lasse Fredslund and Stefan Christoffer Gottlieb
10th Nordic Conference – Tallinn

85 Dynamic Capabilities and Risk Management: Evaluating the CDRM Model for Clients
Abderisak Adam and Göran Lindahl

93 An Opposite Design-Build Procurement Method: Competing on Quality with a Fixed Price
Leif D. Houck

CONSTRUCTION AND PROJECT MANAGEMENT

103 An Appraisal of Water Infrastructure Projects’ Financing Challenges in South Africa
Khotso Dithebe, Clinton Aigbavboa and Didi Wellington Thwala

111 The Soft Factors in Design Management: a Hidden Success Factor?
Ida Marie Tvedt and Kine Agnethe Dyb

119 Room to Manoeuvre: Governing the Project Provisions
Olav Torp, Ingemund Jordanger, Ole Jonny Klakegg and Yvonne C.B. Bjerke

129 A Longitudinal View of Adopting Project Alliancing: Case Finland
Pertti Lahdenperä

137 A Simulation-Based Optimization for Contractors in Precast Concrete Projects
Shiwei Chen, Kailun Feng and Weizhuo Lu

147 Governed by Municipal Land Allocations: Implications for Housing Developers
Melissa Candel and Tina Karrbom Gustavsson

155 Situation Picture Through Construction Information Management
Risto Kärkkäine, Rita Lavikka, Olli Seppänen and Antti Peltokorpi

163 Who Benefit from Crime in Construction? A Structural Analysis
Jardar Lohne, Frode Drevland and Ola Lædre

171 Quality Evaluation of Contractor’s Schedule in the Bidding Phase
Marco A. Bragadin and Kalle Kähkönen

179 Activity Cruciality as Measure of Network Schedule Structure Resilience
Gunnar Lucko and Yi Su

189 Construction Programmes and Programming: A Critical Review
Oluseun Olubajo, Will Hughes and Libby Schweber
195 Procurement Research: Current State and Future Challenges in the Nordic Countries
   Tina Karrbom Gustavsson, Anna Kadefors, Sofia Lingegård, Ola Laedre, Ole Jonny Klakegg, Nils Olsson and Johan Larsson

205 Exploitative Learning in Inter-Organizational Projects: Evidence from Dutch Infrastructure Practices
   Yan Liu, Marcel Hertogh and Erik-Jan Houwing

213 The Transition from Design-Bid-Build Contracts to Design-Build
   Anna-Therése Järvenpää, Johan Larsson and Per Erik Eriksson

221 Exploring the Dynamics of Supplier Innovation Diffusion
   John Lindgren and Kristian Widén

229 Understanding Collaborative Working in a Facilitated Interdisciplinary Environment
   John Connaughton and William Collinge

237 Ensuring Successful Knowledge Transfer in Building Renovation Projects
   Anandasivakumar Ekambaram and Andreas Økland

243 Public Private Collaboration in the Context of Zero Emission Neighbourhood
   Anandasivakumar Ekambaram, Ann Kristin Kvellheim and Luitzen de Boer

253 Strategizing and Project Management in Construction Projects: An Exploratory Literature Review
   Anne Klitgaard and Stefan Christoffer Gottlieb

BUILDING INFORMATION, DATA AND DIGITALIZATION

261 BIM-Enabled Education: a Systematic Literature Review
   Emlyn Witt and Kalle Kähkönen

271 A BIM-Enabled Learning Environment: a Conceptual Framework
   Emlyn Witt and Kalle Kähkönen

281 “I Work All Day with Automation in Construction: I am a Sociomaterial-Designer”
   Henrik Buhl, Michael Andersen and Hannele Kerosuo

289 Developing Smart Services to Smart Campus
   Suvi Nenonen, Ruud van Wezel and Olli Niemi

297 An Overview of BIM Adoption in the Construction Industry: Benefits and Barriers
   Kaleem Ullah, Irene Lill and Emlyn Witt
<table>

STAKEHOLDERS OF CONSTRUCTION AND REAL ESTATE

409 Challenging the Rhetoric of Construction Briefing: Insights from a Formula 1 Sports Venue
Nick M. Hollely and Graeme D. Larsen

419 Underlying Causes for Risk Taking Behaviour Among Construction Workers
Radhlinah Aulin, Åsa Ek and Christofer Edling

427 Towards Developing a Framework for User-Driven Innovation in Refurbishment
Søren Møller Kæseler, Hasse H. Neve and Søren Wandahl

437 Reconstructing Knowledge Integration in the Norwegian AEC-Industry
Jørgen Skatland and Jardar Lohne

445 Institutional Complexity for Chinese International Contractors
Yafan Fu and Roine Leiringer

BUILT ENVIRONMENTS

455 BIM Related Innovation in Healthcare Precinct Design and Facilities Management
Giles Thomson, Göran Lindahl, Ammar Shemery, Mattias Roupé, Keith Hampson and Mikael Johansson

463 Location is Crucial in Retrofit: Strategy Selection in Different Regions
Eero Nippala and Terttu Vainio

CONSTRUCTION EDUCATION AND RESEARCH

473 From Theoretical to Practical Competence on Health and Safety
Tina Åsgård and Pål Nygaard

481 A Test Platform of Viable Methods to Improve Production and Learning on Construction Sites
Kajsa Simu, Christine Räisänen and Jarkko Erikshammar
1. Introduction
This volume of proceedings comprises selected papers presented to the 10th Nordic Conference on Construction Economics and Organization (CEO2019) held in Tallinn, Estonia on the 7th and 8th May, 2019. All selected papers have undergone a rigorous, double-blind, peer review process under the auspices of a scientific committee of internationally recognised researchers.

The CEO2019 conference was organised by the Building Lifecycle Research Group in the Department of Civil Engineering and Architecture of Tallinn University of Technology in association with the CREON (Construction Researchers on Economics and Organisation in the Nordic region) network.

The CREON network is responsible for this conference series. It is a voluntary, non-profit association for people who study, work, teach and research into the management in and of construction in all of its aspects. Its aims are:

- to promote education, dissemination and research connected with management in and of construction by any means available;
- to encourage excellence in the research of CREON members;
- to hold conferences, workshops and seminars for members, notably the recurrent conference series “Nordic Conference on Construction Economics and Organization”;
- to encourage the exchange of ideas and experiences through a newsletter;
- to provide a forum for debate about all matters concerned with management in and of construction in the Nordic region.

2. Conference Themes
Against a backdrop of globalization, the free movement of people, goods, services and capital, particularly within the European Single Market, suggest that it is increasingly relevant to consider the construction industry from a regional perspective. Regional integration brings with it both opportunities - to expand operations and smooth out the volatility of construction boom-bust cycles in smaller countries - and associated challenges such as greater competition and the conditions governing posted workers. The academic research community has historically embraced networking beyond national boundaries, but, under these same drivers, regional and international research coalitions are increasingly becoming the norm.

The 10th Nordic Conference on Construction Economics and Organization is focused on exploring these developments with its general theme “Regional markets, networks and opportunities”.

Academic and industry contributions to the conference were invited and received in the following subthemes and topics:

The economics and business of construction
- Economic modelling
- Whole life costing
• Business models and strategies
• Value in construction and real estate
• Supply chains

Construction and project management
• Quality, time and cost management
• Risk management
• Procurement management
• Performance measurement
• Decision-making

Building information, data and digitalization
• Building Information Modelling
• Digital design
• IT for construction
• Construction data
• Big data

Innovations in the construction process
• Lean construction
• Off-site construction
• Industrial construction
• Relational contracting
• Early contractor involvement

Sustainability and resource efficiency
• Social, environmental and economic sustainability
• Zero energy buildings
• Renewable energy
• Energy efficiency
• Climate change

Stakeholders of construction and real estate
• Stakeholder roles
• Gender and diversity
• Health, safety and well-being
• Organisations and institutions
• Dispute resolution
10th Nordic Conference – Tallinn

Built environments
- Architectural and urban planning issues
- Value and meaning of spaces
- Smart cities
- Healthy cities
- Disaster resilience

Construction education and research
- Learning, training and education
- Study/work interfaces
- Research orientations and directions
- Theories and frameworks
- Research methods

Other topics linked to the overall conference theme
- Regional, national, local contexts
- Governance
- Legislation and regulation
- Ethics
- Multidisciplinarity

The conference chairs, Professor Irene Lill (Tallinn University of Technology) and Associate Professor Emlyn Witt (Tallinn University of Technology) would like to take this opportunity to thank all the members of the Organising and Scientific Committees for their efforts in making this conference a success.

3. Organising Committee

Local Organisers
- Emlyn Witt, Tallinn University of Technology
- Irene Lill, Tallinn University of Technology
- Moonika Mändla, Tallinn University of Technology

CREON Board Members
- Göran Lindahl, Chalmers University
- Kalle Kähkönen, Tampere University of Technology
- Suvi Nenonen, Aalto University
- Ole Jonny Klakegg, Norwegian University of Science and Technology
- Kim Haugbolle, Aalborg University
- Kristian Widén, Halmstad University
- Stefan Christoffer Gottlieb, Aalborg University
- Nils Olsson, Norwegian University of Science and Technology
4. Scientific Committee

Emlyn Witt, Tallinn University of Technology (Chair)
Radhulnah Aulin, Lund University
Abdulquadri Bilau, Tallinn University of Technology
Christian Brockmann, University of Applied Sciences Bremen
Henrik Buhl, Copenhagen School of Design and Technology
John Noel Connaughton, University of Reading
Pernilla Gluch, Chalmers University of Technology
Stefan Christoffer Gottlieb, Aalborg University
Kim Haugbølle, Aalborg University
Marleen Hermans, Delft University of Technology
Sari Hirvonen-Kantola, University of Oulu
Eilif Hjelseth, Norwegian University of Science and Technology
Leif Daniel Houck, NMBU
Pekka Huovinen, Business Management PJH, UKKO.fi, SLP Group Oy
Per Anker Jensen, Technical University of Denmark
Carlos Jimenez-Bescos, Anglia Ruskin University
Tina Karrbom Gustavsson, KTH Royal Institute of Technology
Ole Jonny Klakegg, Norwegian University of Science and Technology
Vegard Knotten, Veidekke
Ola Laedre, Norwegian University of Science and Technology
Pertti Lahdenperä, VTT Technical Research Centre of Finland
Johan Larsson, Luleå University of Technology
Roine Leiringer, University of Hong Kong
Margarita Leonova, Tallinn University of Technology
Roode Liias, Tallinn University of Technology
Göran Lindahl, Chalmers University of Technology
John Erik Artur Lindgren, Halmstad University
Jardar Lohne, Norwegian University of Science and Technology
Johan Nyström, VTI
Stefan Olander, Lund University
Nils Olsson, Norwegian University of Science and Technology
Ergo Pikas, Technical University of Denmark
Viktoria Prilenska, Tallinn University of Technology
Raido Puust, Tallinn University of Technology
Christine Räisänen, Chalmers University of Technology
Marcus Sandberg, Luleå University of Technology
Jussi Matias Savolainen, Tampere University of Technology
5. Continuity
The first Nordic Conference on Construction Economics and Organization was held at Chalmers University of Technology in Gothenburg, Sweden, in 1999. Since then, this series of conferences has become an important biennial event bringing together academics and industry professionals from the Nordic countries and around the world to network and share their most recent findings and experiences.

We thank all the keynote speakers, authors and colleagues who have contributed their time and effort towards a successful and stimulating 10th conference and we now look forward to the 11th conference which is planned to take place in 2021.
