

# INDEX

- Academic journals, analysis of, 87
- Academic research, 50, 239
  - in business collaboration and partnerships to develop disruptive business strategy, 236
- Academic study, 69–70
- Accessibility, 75–76
- Accounting industry, 174
- Accounts function, 174–176
- Adaptability, 180
- Additive manufacturing, 256
- Advanced analytics, 174
- Advertising, 72
  - truth in advertising/deception, 71–72
- Advertising Standards Authority (ASA), 72
- Affiliation statistics, influential authors and, 282
- Agility and innovation, 8–10
- AHP, 41
- Airbnb, 167–168
- Algorithmic ethics, 84
- AMP Robotics, 76–77
- Analytical CRM processes, 269
- Analytical technique, 211
- Apple, 68, 230
- Applied Analytics (AA), 166
- Article extraction and assessment, 28
- Artificial intelligence (AI), 3, 7–8, 10, 13, 21–22, 49, 84–85, 127, 140, 171–172, 174–175, 177, 185–186, 194–195, 206–207, 256, 260–261, 276, 284
  - AI-driven analytics, 172
  - AI-driven process automation, 13
    - landscape in services and marketing, 11
    - transformative potential of, 147–148
- Augmented reality (AR), 49, 99, 118, 140, 143, 145, 256
  - technology, 143
  - transformative potential of, 147–148
- Authentic narratives, crafting, 146
- Automated checkout, 263
- Automated technologies, 166
- Automation, 190–191
  - capabilities, 265
  - of payment processing, 266
  - of processes, 174
- Autonomous devices, 49
- Axie Infinity, 111
- Behavioral direction, 245–246
- Beyond 5G wireless networks (B5G wireless networks), 196–197
- Bibliographic coupling, 52–53, 123
- Bibliometric analysis, 24–25, 41, 84, 86, 119, 121, 123, 216, 235, 277
  - co-authorship and citation analysis, 122
  - evolution and distribution of publications, 121
  - of metaverse research, 104
  - research areas originating from, 126–127
- Bibliometric assessment, 101
- Bibliometric coupling, 121, 123
- Bibliometric examination, 103
- Bibliometric review and directions
  - analysis and results, 279–285
  - co-occurrence keywords, 282–285
  - common threads explored across studies, 286–287
  - country-wise publication, 280–281

- findings, 286–287
- implications, 287–288
- influential authors and affiliation statistics, 282
- leading publishing journals, 282
- limitations and future research, 288–289
- research methodology, 278–279
- scientific publications per year, 280
- Bibliometric software, 85–86
- Bibliometrics analysis, 100–101
  - application of, 101–103
- Bibliometrix, 25
- Biblioshiny R studio, 208–209
- Big data, 195, 256, 264, 276, 284
  - analytics tools, 58–59
- Biodegradable materials, 76–77
- Blockchain, 3, 13, 107, 173–174, 194–195, 206
  - in finance, 7–8
- Blockchain technology (BT), 7–8, 10, 196, 264, 266
- Bottom-up change management, 22
- Burst keywords, analysis of, 89–91
- Burst literature
  - analysis of, 89–91
  - analysis of burst keywords, 89–91
  - analysis of co-citation, 91–92
  - analysis of thematic and emerging trends, 91
- Business (es), 68, 70, 73, 179
  - collaboration and partnerships to develop disruptive business strategy academic research, 236
  - environment, 206
  - performance, 174, 180
  - research, 239
- Business model innovation, 4–6
  - value capture, 5–6
  - value proposition creation, 4–5
- Business strategy, 244
  - academic research in business
    - collaboration and partnerships to develop disruptive business strategy, 236
  - background, 231–232
  - behavioral direction, 245–246
  - collaborative focus, 243–244
  - disruptive innovation focus, 242–243
  - future research directions, 244–248
  - knowledge creation direction, 247–248
  - research design, 232–236
  - resource-based direction, 247
  - results, 236–244
  - structural direction, 246–247
  - structural focus, 244
  - theoretical and methodological approaches used in studies, 236–244
- Call center integration, 266
- Cashless payment methods, 167–168
- Centrality, 34–36
- Change
  - innovation/organization
    - performance in age of, 214–215, 219
  - leadership style and adapting to, 219
- Change management, 38–39
  - article extraction and assessment, 28
  - citation network analysis, 34–36
  - cluster analysis, 36–40
  - co-citation analysis, 36
  - database selection, 27
  - framework to develop disruptive innovation strategies and well-being, 40
  - future research direction, 41
  - implications, 40–41
  - keyword co-occurrence analysis, 32
  - literature review, 20–25
  - management support to handle crisis, 40
  - methodology, 25–28
  - organizational resources pathway for handling disruptive innovation, 39

- process, 40–41
- research for management of
  - disruptive innovation, 38–39
- research questions, 29–40
- search strategy, 28
- strategy building based on market and competitor's plan, 39–40
- top cited sources, 30–31
- top contributing authors, 29
- yearly publication trend analysis, 29–32
- Chatbots, 260–261
- ChatGPT tool, 84
- Citation analysis, 121–122
  - network analysis, 34–36
  - over years, 104
- CiteSpace software, 86–89, 91, 93–94
- citNetExplorer, 211
- Classical ATMs, 266
- Clinical decision support, 84
- Clinical decision support system (CDSS), 89–90
- Cloud, 256
- Cloud computing, 7–8, 10, 194–195, 206
- Cluster analysis, 36, 38–41, 89, 235
- Clustering results, 89
- Co-author analysis, 120
- Co-authorship, 122
  - evaluating level of, 120–121
- Co-citation analysis, 32, 36, 91–92
  - of articles, 211
